## INTRODUCTION

This volume brings together the more important series of statistics prepared by the Department of Agriculture or compiled by the staff for official use. For many series, presented in brief summary, more extensive data are available. This is particularly the case with monthly series of prices and movements and with the tables on production of commodities by States. Current statistics, comparable with those here presented, can be obtained from periodicals and mimeographed reports published by the Department.

The Committee has necessarily attempted to reconcile the convenience of users who need extensive detail on a commodity with the general principle of effective service to the largest number of users within the practical limits of a single handbook. This book has not been considered a medium of original publication; hence, very few tables represent work in progress less than 5 years and, in those cases, only the special form used in the compilation will be found previously unpublished. Unless otherwise advised, users may take the figures in this book for the years covered and go back of them in time to previous volumes. When the word "Yearbook" alone appears in this volume, it refers to the Yearbook of Agriculture, published by this Department.

## ACREAGE, YIELD, AND PRODUCTION OF CROPS

The crop and livestock reporting service of the Department estimates acreage of crops, numbers of livestock, and production, farm utilization, prices paid to farmers, farm sales, and farm value of crops, livestock, and livestock products.

Acresages for the years 1909, 1919, 1924, 1929, and 1934 are based largely on the agricultural censuses. Acresages in recent intercensal years have been based on the year-to-year changes shown by approximately 200,000 returns which rural mail carriers secure each year from individual farmers, supplemented in each State by returns to mailed inquiries and such other indications of acreage or production as are locally available, including State enumerations, local surveys, frontage

measurements, carlot shipments, elevator and warehouse receipts, cotton ginnings, tobacco sales, sugar-beet purchases, and acreages of special crops contracted by processing companies. Revisions to the 1940 census for 1940 and 1941 appear in this issue; for 1929-39 they will appear in the 1943 book.

Yields per acre are based in part on reports of one or more farmers in each agricultural township on the average yield per acre in their localities and in part upon yields derived from reports of acreage and production of principal crops on individual farms. For all crops except cotton and a few minor crops, yields from 1919 to 1939 have been adjusted to be comparable with the census yields. For cotton, acreage, yield, and production are based upon the census and other statistical data developed from the agricultural programs. The production agrees with census ginning enumerations, with some adjustments between States where cotton grown in one State was ginned in another. Linters are not included in cotton figures, unless so stated in the respective tables.

Estimates of farm stocks, farm disposition, sales, utilization, and crop condition are based either upon sample data for individual farms or upon estimates of crop reporters for their localities, supplemented by such check data as are available. Monthly sales by farmers are based upon returns from farmers or primary handlers and upon check data, such as railroad shipments, ginnings, etc.

#### COMMERCIAL CROPS

The term "commercial" is used in connection with certain crop estimates to distinguish some part of the total production of a crop. Commercial truck-crop production is concerned only with those areas growing crops primarily to supply the large consuming markets more or less distant from the producing center. "For fresh market" refers to those truck crops grown for direct shipment and consumption in their fresh state. Production in home and market gardens, intended primarily for local sale, is excluded. Similarly, "for processing" refers only to quantities grown for use by canning, freezing, or packing establishments and excludes quantities canned in the home. For the areas concerned, the total production relates to that suitable for food-marketing purposes unless destroyed by natural cause before harvest, whether or not the entire crop finds a market or use. In these production estimates, therefore, are retained those quantities of produce which ordinarily would be marketable, but which are left unharvested because of adverse marketing conditions. Production for processing includes the total quantities of raw product used by packers, freezers, or canners for manufacturing purposes. For apples, commercial production relates to the commercial apple areas of each State and differs from former commercial crop, which represented sales for fresh consumption only, but for the entire State.

#### PRICES RECEIVED BY FARMERS

Mid-month prices received by farmers are based on returns from a special list of price reporters, composed mainly of country buyers of or dealers in agricultural products. These average local market prices are, for the most part, prices received for all grades and qualities of a specific commodity sold on or about the 15th of each month. United States prices, both by months and for the crop marketing season, are computed by weighting State prices by production.

Season average prices, by States, are calculated by weighting monthly prices by estimated sales during the marketing season. Farm values for most commodities are computed by applying the season average price, by States, to production, excluding any not harvested on account of market conditions.

For commercial truck crops and for certain fruit crops, the prices shown are the estimated season averages of the prices received by farmers at the shipping point, including the cost of the container where this is a customary requirement of delivery. Citrus and some other fruits are valued at equivalent per unit returns, excluding packing, grading, and container costs, rather than at average prices for all sales. A few crops, for which neither weighted averages of monthly prices nor average prices for the entire marketing season are available, are valued at December 1 prices. These are based upon returns from crop reporters.

The index numbers of prices received by farmers consist, for the most part, of the aggregate value of a fixed quantity of goods—based on current mid-month prices for those commodities—expressed as a percentage of the aggregate value of the same commodities in the base period (August 1909–July 1914). The ratio of these index numbers of prices received by farmers to the index numbers of prices paid by farmers measures the monthly variation in the per-unit exchange value of farm products.

#### LIVESTOCK PRODUCTION

Numbers of livestock on farms on January 1 are based on the census enumerations, supplemented by enumerations by local assessors, by brand-inspection records, and by records of shipments. Numbers on January 1 in census years are adjusted for indicated changes between January 1 and the date of the census. In the intercensal years the numbers of livestock are estimated by methods similar to those used for crop acreages. These estimates have been revised to the 1940 census base.

The average values per head on January 1 are based upon returns from correspondents relating to livestock in their vicinity. These reflect inventory values as distinguished from the monthly prices which relate to sales. The farm value on January 1 is computed by applying the average value per head to the number on farms.

Estimates of production and farm utilization of livestock and livestock products are based upon sample data for individual farms, supplemented by check data of shipments, receipts, manufactures, and other similar data. For milk and egg production, the samples relate to production on the first day of each month.

#### MARKET SUPPLIES AND PRICES

The market news service of the Department supplies much of the information on market prices and movements. The leased-wire telegraph system in use extends from the Atlantic to the Pacific Ocean and reaches most of the important markets. At each of the branch offices commodity specialists gather information regarding supply, market demand, and prices of the products on which they report. They observe sales actually made on the markets and are constantly in touch with the traders, who in many instances give them access to office records in order that specific information may be had, on which to base their reports.

Carlot shipments and market receipts of crops and livestock products are reported by officials and agents of railroads, express companies, and boat lines, or are compiled from trade publications. Shipments to market by motortruck have continued important, and at a few of the markets receipts by truck are reported by dealers and distributors. Data on receipts, slaughter, and shipments of livestock are obtained from monthly reports submitted by the public stockyards. Data on cold-storage stocks are obtained directly from all important cold-storage warehouses, and data on commercial stocks of grain are reported by boards of trade, etc. Leaf-tobacco stocks are reported directly by dealers and manufacturers. Reports on the grade and staple of cotton ginned in the principal cotton-producing States are based on samples currently obtained from a substantial number of representative gins, a sample from every bale. Annually the grade and staple of the cotton on hand August 1 is reported. Data on the quality of grain crops are obtained from reports of inspectors licensed under the Grain Standards Act.

Where a weighting factor is available, market prices as shown are weighted averages. But in many cases a weighting factor is not available, and the prices shown are usually the means of ranges of quotations without reference to quantity.

Prices derived from different sources may not be strictly comparable although for most purposes they are satisfactory. Data covering commercial stocks and movements of various commodities are as nearly complete as practicable and are considered fairly representative.

#### IMPORTS AND EXPORTS

The tables of international trade cover substantially the international trade of the world in agricultural products of interest in the United States. The total imports and total exports in any one year cannot be expected to balance, although disagreements tend to be compensated over a series of years. Among the sources of disagreement are: The different periods covered by the trade years of various countries; imports received in the year subsequent to the year of export; lack of uniformity in classification of goods as among countries; varying degrees of failure in recording countries of origin and ultimate destinations; different practices in recording reexported goods; and different methods of treating free ports. In the international trade tables the exports given are, as far as possible, domestic exports and, therefore, include exports of commodities which are the growth, produce, or manufacture of the specified country, as well as exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture after importation. In the case of foreign countries the imports given are "special" or net imports, rather than general imports, whenever it is possible to distinguish such imports from general imports. General imports are all the reported arrivals, whereas special or net imports are general imports less reported reexports of merchandise previously imported and not changed from the condition in which imported. Special or net imports are used in the international trade tables for the following countries: Belgium, Denmark, Egypt, Ireland, China, Netherlands Indies, France, and the United Kingdom.

In both the United States trade tables and the international trade tables, the United States trade figures are domestic exports as defined above and, until January 1934, general imports, unless otherwise specified. Beginning with January 1934 imports for consumption are given. Imports for consumption include all commodities released by customs for entry. For any given period general imports will differ from imports for consumption to the extent that arrivals reported as placed in bonded customs warehouses during the period differ from reported withdrawals from such warehouses for consumption. Export and import statistics of the United States include trade with the Philippine Islands. They also include any trade between foreign countries and Alaska, Hawaii, and Puerto Rico, but do not include shipments between continental United States and these possessions. Prior to January 1, 1935, the Virgin Islands of the United States were treated in the same manner as the Philippine Islands, but since that date the Virgin Islands are treated in the same manner as Alaska, Hawaii, and Puerto Rico.

#### OTHER STATISTICS

Statistics of acreage and production in foreign countries are compiled, as far as possible, from official sources and are, therefore, subject to whatever errors may result from shortcomings in the reporting and statistical services of the various countries. Inaccuracies also result from differences in nomenclature and classification in foreign countries. Except where otherwise stated, pre-war data refer to boundaries prior to 1914. Yields per acre are calculated from acreage and production, both rounded to thousand units, and are therefore subject to a greater possibility of error when calculated for countries with small acreage.

#### WEIGHTS AND MEASURES

"Ton" when used in this book without qualification means a short ton of 2,000 pounds.

The following table of weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked in the Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The figures were assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of the commodity, condition and tightness of pack, degree to which the container is heaped, etc. Effort was made to select the most representative and fairest average for each product. For such commodities as develop considerable shrinkage, the point-of-origin weight or weight at harvest was used.

The approximate or average weights, as given in this table, do not (necessarily) have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weights. The table was prepared chiefly for use of workers in the Department of Agriculture, who have need of conversion factors in statistical computations. The figures are subject to revision.

*Weights, measures, and conversion factors used in the Department of Agriculture*

(See explanatory text just preceding this table)

## WEIGHTS AND MEASURES

| Commodity                        | Unit <sup>1</sup>                | Approximate net weight | Commodity                   | Unit <sup>1</sup>                     | Approximate net weight |
|----------------------------------|----------------------------------|------------------------|-----------------------------|---------------------------------------|------------------------|
|                                  |                                  | <i>Pounds</i>          |                             |                                       | <i>Pounds</i>          |

<sup>1</sup> Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches the cranberry barrel, 5,826 cubic inches, and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweetpotatoes, peaches, green beans, green peas, spinach, etc.

<sup>2</sup> Approximate inside dimensions, 10½ by 11½ by 18 inches.

<sup>3</sup> Approximate inside dimensions, 4½ by 16 by 16½ inches.

<sup>4</sup> Approximate inside dimensions, 9¾ by 11 by 20¾ inches.

<sup>5</sup> Approximate inside dimensions, 3¾ by 13½ by 16½ inches.

<sup>6</sup> Approximate inside dimensions, 4¾ by 13½ by 16½ inches.

<sup>7</sup> Approximate inside dimensions, 13 by 18 by 21½ inches.

<sup>8</sup> Approximate inside dimensions, 12 by 12 by 22½ inches.

<sup>9</sup> This is the weight commonly used in trade practice, the actual weight varying according to temperature conditions.

<sup>10</sup> Approximate inside dimensions, 22 by 16 by 20¾ inches.

<sup>11</sup> Approximate inside dimensions, 3¾ by 11½ by 14½ inches.

<sup>12</sup> The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

<sup>13</sup> For statistical purposes the bale of cotton is 500 pounds gross or 478 pounds net weight. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

<sup>14</sup> This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

<sup>15</sup> Approximate inside dimensions, 9¼ by 10½ by 15 inches.

<sup>16</sup> Approximate inside dimensions, 1¼ by 11 by 16½ inches.

<sup>17</sup> Approximate inside dimensions, 12 by 12 by 24 inches.

<sup>18</sup> Approximate inside dimensions, 11½ by 11½ by 24 inches.

<sup>19</sup> Approximate inside dimensions, 5¾ by 13½ by 16½ inches.

<sup>20</sup> Approximate inside dimensions, 4¾ by 16 by 16½ inches.

<sup>21</sup> About 13 pounds of sawdust are required to pack 32 pounds of grapes in a keg, thus making the total weight about 45 pounds.

<sup>22</sup> Approximate inside dimensions, 7¾ by 15 by 18¾ inches.

<sup>23</sup> Approximate inside dimensions, 10 by 13 by 25 inches.

<sup>24</sup> Approximate inside dimensions, 8¾ by 11½ by 18 inches.

<sup>25</sup> Approximate inside dimensions, 12 by 10½ by 33 inches.

<sup>26</sup> Approximate inside dimensions, 3¾ by 11 by 18 inches.

<sup>27</sup> This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying, and the net weight when sold in terminal markets may be far below 55 pounds.

<sup>28</sup> Approximate inside dimensions, 6 by 12 by 24 inches.

## CONVERSION FACTORS

| Commodity  | Unit                           | Approximate equivalent  |
|--|--------------------------------|---|
| Apples.....  | 1 pound dried.....             | 7 pounds fresh.   |
| Do.....  | 1 pound chops.....             | 5 pounds fresh.   |
| Do.....  | 1 barrel.....                  | 3 boxes or 3 bushel baskets.  |
| Apricots.....  | 1 pound dried.....             | 5½ pounds fresh.  |
| Barley flour.....  | 1 barrel (196 pounds).....     | 9 bushels barley.   |
| Beans, lima.....   | 1 pound shelled.....           | 2 pounds unshelled.   |
| Buckwheat flour.....   | 1 barrel (196 pounds).....     | 7 bushels buckwheat.  |
| Cane sirup.....  | 1 gallon.....                  | 5 pounds sugar.   |
| Cherries.....  | 1 pound dried.....             | 4 pounds fresh in California; 5 pounds fresh elsewhere.   |
| Corn, shelled.....   | 1 bushel (56 pounds).....      | 2 bushels (70 pounds) of husked ear corn.   |
| Corn meal:   |                                |   |
| Degermed.....  | 1 barrel (196 pounds).....     | 6 bushels corn.   |
| Nondegermed.....   | 1 barrel (196 pounds).....     | 4 bushels corn.   |
| Cotton.....  | 1 pound ginned.....            | 2.86 pounds unginned.   |
| Dairy products:  |                                |   |
| Butter.....  | 1 pound.....                   | 21 pounds milk.   |
| Cheese.....  | 1 pound.....                   | 10 pounds milk.   |
| Condensed milk, whole.....   | 1 pound.....                   | 2.2 pounds milk.  |
| Evaporated milk, whole.....  | 1 pound.....                   | Do.   |
| Ice cream <sup>29</sup> .....  | 1 gallon.....                  | 15 pounds milk.   |
| Ice cream <sup>29</sup> (eliminating fat from butter and concentrated milk)..... | 1 gallon.....                  | 12 pounds milk.   |
| MalTED milk.....   | 1 pound.....                   | 2.6 pounds milk.  |
| Powdered milk.....   | 1 pound.....                   | 8 pounds milk.  |
| Powdered cream.....  | 1 pound.....                   | 19 pounds milk.   |
| Dates.....   | 1 pound dried.....             | 1¼ pounds fresh.  |
| Eggs.....  | 1 case (45 pounds).....        | 37.5 pounds frozen or liquid eggs, since 1937.  |
| Do.....  | 1 case (45 pounds).....        | 9.8 pounds dried eggs.  |
| Figs.....  | 1 pound dried.....             | 3 pounds fresh in California; 4 pounds fresh elsewhere.   |
| Grapefruit, Florida.....   | 1 case canned.....             | Slightly less than 1 box fresh fruit.   |
| Flaxseed.....  | 1 bushel.....                  | Yields about 2½ gallons oil.  |
| Linseed oil.....   | 1 gallon.....                  | From 0.4 bushel flaxseed.   |
| Malt.....  | 1.1 bushels.....               | 1 bushel barley   |
| Maple sirup.....   | 1 gallon.....                  | 8 pounds sugar.   |
| Nuts:  |                                |   |
| Almonds, imported.....   | 1 pound shelled.....           | 3¼ pounds unshelled.  |
| Almonds, California.....   | 1 pound shelled.....           | 2.22 pounds unshelled.  |
| Brazil.....  | 1 pound shelled.....           | 2 pounds unshelled.   |
| Cashews.....   | 1 pound shelled.....           | 4.55 pounds unshelled.  |
| Chestnuts.....   | 1 pound shelled.....           | 1.19 pounds unshelled.  |
| Filberts.....  | 1 pound shelled.....           | 2.22 pounds unshelled.  |
| Pecans:  |                                |   |
| Seedling.....  | 1 pound shelled.....           | 2.93 pounds unshelled.  |
| Improved.....  | 1 pound shelled.....           | 2.38 pounds unshelled.  |
| Pignolias.....   | 1 pound shelled.....           | 1.3 pounds unshelled.   |
| Pistachios.....  | 1 pound shelled.....           | 2 pounds unshelled.   |
| Walnuts:   |                                |   |
| Black.....   | 1 pound shelled.....           | 8½ pounds unshelled.  |
| Persian (English).....   | 1 pound shelled.....           | 2.38 pounds unshelled.  |
| Oatmeal.....   | 1 barrel (196 pounds).....     | 10½ bushels oats.   |
| Peaches, California.....   | 1 pound dried.....             | 5½ pounds fresh.  |
| Peanuts.....   | 1 pound shelled.....           | 1½ pounds unshelled.  |
| Pears.....   | 1 pound dried.....             | 5½ pounds fresh.  |
| Peas, green.....   | 1 pound shelled.....           | 2.5 pounds unshelled.   |
| Prunes.....  | 1 pound dried.....             | 2½ pounds fresh in California; 3 to 4 pounds fresh elsewhere.   |
| Raisins.....   | 1 pound.....                   | 4 pounds fresh grapes.  |
| Rice.....  | 1 pound milled.....            | 1.62 pounds rough or unhulled rice.   |
| Rye flour.....   | 1 barrel (196 pounds).....     | 6 bushels rye.  |
| Sugar.....   | 1 ton raw.....                 | Hawaii, 0.9617 ton refined; Puerto Rico and Philippines, 0.946 ton refined; Cuba, 0.9418 ton refined, beginning with the 1931-32 season; Louisiana (96° raw), 0.9346 ton refined, beginning 1919; Florida (96° raw), 0.9346 ton refined beginning 1928. |
| Tobacco.....   | 1 pound farm-sales weight..... | Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See Circular 435, U. S. Dept. of Agr.)   |
| Wheat flour.....   | 1 barrel (196 pounds).....     | 4.7 bushels wheat. <sup>30</sup>  |
| Wool.....  | 1 pound scoured.....           | 2 pounds grease.  |
| Do.....  | 1 pound pulled.....            | 1½ pounds grease.   |

<sup>29</sup> The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

<sup>30</sup> This figure (4.7) has been used for conversions relating to the period 1921-41. Because of changes in milling processes, the following factors have been used for earlier periods: 1790-1879, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels.

# STATISTICS OF GRAINS

TABLE 1.—Wheat: Acreage, production, value, and foreign trade, United States, 1899-1941

| Year               | Acreage harvested | Yield per acre | Production    | Season average price per bushel received by farmers <sup>1</sup> | Farm value    | Average price per bushel, year beginning July, at— |                          | Foreign trade, including flour, year beginning July <sup>4</sup> |                      |                          |                          |

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.

<sup>2</sup> No. 2 Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Chicago Daily Trade Bulletin through May 1942; Chicago Journal of Commerce beginning June 1942.

<sup>3</sup> 1899-1917, No. 1 Northern Spring and 1918 to date No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold, as reported in the Minneapolis Daily Market Record.

<sup>4</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26, January and June issues, 1927-date. Wheat flour converted to terms of grain on the following basis: 1899-1908, 4.75; 1909-17, 4.7; 1918 and 1919, 4.5; 1920, 4.6; 1921-date, 4.7 bushels of grain per barrel of flour.

<sup>5</sup> Includes flour milled from imported wheat.

<sup>6</sup> Includes wheat imported for milling in bond and export.

<sup>7</sup> Total exports (domestic plus foreign) minus total imports; beginning 1933, net figures are domestic exports minus imports for consumption.

<sup>8</sup> Net imports; i. e., imports for consumption minus domestic exports.

<sup>9</sup> Includes an allowance for unredeemed loans at average loan value.

<sup>10</sup> 83,000,000 bushels of the total exports were sold with the assistance of payments available through wheat and wheat-flour export programs. (Footnotes 11-14 at bottom of page 10.)

TABLE 2.—Wheat, winter, all spring, durum, and other spring: Acreage seeded and harvested, and production, United States, 1909-41

| Year              | Winter                           |                   |                          |               | All spring     |                   |                          |               |

<sup>1</sup> Preliminary.<sup>2</sup> Includes an allowance for unredeemed loans at average loan value.<sup>3</sup> Small additional quantities are grown in other than the 3 States shown here, but included with "Other spring" wheat.

Agricultural Marketing Service.

[illegible]

<sup>1</sup> Figures refer to year of harvest. Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere countries in 1941 is combined with the Southern Hemisphere harvest which began late in 1941 and ended early in 1942. Estimated totals and subtotals include approximations for countries left blank.

<sup>a</sup> Figures refer to harvested areas as far as available.

3 Preliminary.

4 Unofficial.

<sup>5</sup> Includes Austria, Sudetenland, and Memelland.

\* Estimates covering territory not included with Germany and Hungary.

<sup>7</sup> Because of changes in boundaries, not strictly comparable with other years.

<sup>a</sup> Since 1933 heavy harvesting losses have not been taken into account; production estimates for 1933-38, therefore, have been adjusted downward by about 10-20 percent in the world total.

<sup>9</sup> 4-year average.

<sup>10</sup> Estimates of the South Manchurian Railway.

11 Gown area, less average abandonment of about 13 percent.

Office of Foreign Agricultural Relations. Compiled from official sources and International Institute of Agriculture.

TABLE 6.—Wheat: Production in specified countries, 1899-1941

| Year of harvest <sup>1</sup> | U. S. S. R. <sup>2</sup> | United States   | China           | Canada          | India           | Argentina       | Australia       | France           | Europe and U. S. S. R. | Northern Hemisphere, excluding China | World, excluding China |

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere countries in 1941 is combined with the Southern Hemisphere harvest which began late in 1941 and ended early in 1942.

<sup>2</sup> Includes all Russian territory reporting for years named.

<sup>3</sup> Total Russian Empire exclusive of the 10 Vistula Provinces of Russian Poland and the Province of Batum in Transcaucasia.

<sup>4</sup> Exclusive of Russian Poland, Lithuania, parts of present Latvia and Ukraine, and 2 Provinces of Transcaucasia.

<sup>5</sup> Beginning with this date estimated production is within present boundaries of the Union of Soviet Socialist Republics, excluding Turkestan, Transcaucasia, and the Far East, which regions in 1924 produced 51,706,000 bushels and, in 1925, 58,000,000 bushels.

<sup>6</sup> Beginning with this date production is within post-war boundaries and therefore not comparable with earlier years.

<sup>7</sup> Since 1933 heavy harvesting losses have not been taken into account; production estimates have been adjusted downward 10 to 20 percent in U. S. S. R. and group totals.

<sup>1</sup> Does not include wheat used for seed in those States for which production estimates of wheat for grain are not made.

<sup>2</sup> Relates to quantities used on farms where produced. Additional quantities of purchased wheat are so utilized.

<sup>3</sup> Preliminary.

Agricultural Marketing Service. Relates to disposition of the crop specified and not to disposition within the marketing year.

<sup>1</sup> The cost figures are based on average-per-acre yields of wheat, and on prevailing cost rates for labor, farm power, materials, equipment, and land rent.

<sup>2</sup> Yield per acre is a weighted average.

<sup>3</sup> Includes the 6 New England States, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, and Kentucky.

<sup>4</sup> Includes North Carolina, South Carolina, Georgia, Alabama, Tennessee, and Arkansas.

<sup>5</sup> Includes Idaho, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Bureau of Agricultural Economics. See further details in table 744.

<sup>1</sup> Less than 500 bushels.<sup>2</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics.

Estimated production by classes represents production in each State, broken down on basis of quinquennial wheat-variety surveys. Estimated exports represent total exports as reported by Bureau of Foreign and Domestic Commerce broken down on basis of inspections of wheat for export by ports and classes in the United States and Canadian Eastern Grain Division.

<sup>1</sup> Preliminary.<sup>2</sup> Includes exports of flour made from domestic wheat, and foreign wheat milled in bond.<sup>3</sup> No data published after September 1941, due to war emergency.

Bureau of Agricultural Economics. Compiled from Monthly Summary of Foreign Commerce of the United States. Flour converted into terms of wheat on the basis that 1 barrel of flour is the product of 4.7 bushels of grain.

<sup>1</sup> In mills and mill elevators attached to mills, owned by mills and stored for others, Bureau of Census figures raised to represent all merchant mills.

<sup>2</sup> From reports of Foreign and Domestic Commerce of the United States. Imports include full-duty wheat, wheat paying a duty of 10 percent ad valorem, and dutiable flour in terms of wheat; and exclude flour free for export as follows: 42,742 bushels in 1935-36; 108,095 bushels in 1937-38; 363,263 bushels in 1938-39; 213,930, 1939-40; and 169,670, 1941-41. Exports include only flour made from domestic wheat; 1930-35 estimated on basis of total exports less wheat imported for milling in bond and export adjusted for changes in carry-over; beginning 1935, figures for exports and shipments of flour wholly from United States wheat.

<sup>3</sup> Includes durum wheat returned from Montreal, estimated at 1,500,000 bushels.

<sup>4</sup> 1930-36, inclusive, some new wheat included in commercial stocks and merchant mills stocks. Beginning with 1937 only old crop wheat is shown in all stocks positions; new wheat was excluded as follows (1,000 bushels): 1937, 19,675; 1938, 19,566; 1939, 41,206; 1940, 13,450; and 1941, 21,509.

<sup>5</sup> Includes wheat used in mixed commercial feeds and wheat fed on farms other than where grown.

<sup>6</sup> Shipments are to Alaska, Hawaii, Puerto Rico, and Virgin Islands (Virgin Islands prior to Dec. 31, 1934, included with domestic exports). 1940 estimated in absence of official figures.

<sup>7</sup> For individual items, see "Supply" section of this table.

<sup>8</sup> These figures are on a different basis from those in earlier issues of Agricultural Statistics.

Bureau of Agricultural Economics and Agricultural Marketing Service.

TABLE 14.—Wheat: Commercial stocks in United States and Canada, average 1930-39, annual 1931-41

DOMESTIC WHEAT IN UNITED STATES <sup>1</sup>

| Year beginning July— | July                 | Aug.                 | Sept.                | Oct.                 | Nov.                 | Dec.                 | Jan.                 | Feb.                 | Mar.                 | Apr.                 | May                  | June                 |

<sup>1</sup> Domestic wheat in store in public and private elevators at terminal markets and wheat afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> United States wheat in store at Canadian points or afloat in vessels or barges in harbors of lake and seaboard ports, Friday nearest the 1st of the month.

<sup>3</sup> Canadian wheat in Canada exclusive of farm stocks, Friday nearest the 1st of the month.

<sup>4</sup> Canadian wheat in store and afloat at United States lake and seaboard ports, Saturday nearest the 1st of the month.

Agricultural Marketing Service. United States and Canadian wheat in Canada from Canadian Bureau of Statistics.

TABLE 15.—Wheat: Receipts graded by licensed inspectors, United States, by classes and grades, 1932-40

| Class and year beginning July | No. 1            | No. 2            | No. 3            | No. 4            | No. 5            | Sample           | Total            |

<sup>1</sup> Includes an allowance for unredeemed loans at average loan value.

<sup>2</sup> Preliminary.

Agricultural Marketing Service; based on returns from special price reporters. Monthly prices, by States, weighted by production to obtain monthly prices for the United States. Season average prices for each State based on monthly prices weighted by estimates of monthly sales during the crop marketing season. Season average prices, by States, weighted by production to obtain United States season average.

<sup>1</sup> Compiled from Northwestern Daily Produce News through May 1940; subsequently from reports of the, Agricultural Marketing Service. Grade not quoted prior to June 1940.

<sup>2</sup> 1900–1908 averages of monthly high and low from Annual Statistical Report, New York Produce Exchange, of No. 1 Northern Spring; 1909 to date averages of daily closing prices in the cash market from New York Journal of Commerce.

<sup>3</sup> Compiled from Broomhall's Yearbooks and Corn Trade News. 1900–1925, imported red; 1926 to date average of all parcels at Liverpool.

<sup>4</sup> Average for 6 months.

<sup>5</sup> Average for 10 months.

<sup>6</sup> No. 1 Dark Northern Spring beginning 1918.

<sup>7</sup> Average for 11 months.

<sup>8</sup> Estimated, on basis of Seattle prices.

<sup>9</sup> Hard Amber Durum beginning 1934.

<sup>10</sup> Market closed September 1939.

Bureau of Agricultural Economics.

The prices at Chicago, Minneapolis, Kansas City, and St. Louis are weighted averages. Portland, New York and Liverpool are simple averages. The weighted average prices are compiled from daily trade papers of markets named.

TABLE 19.—Wheat: Average price per bushel of reported cash sales at Minneapolis, St. Louis, Kansas City, and 6 markets combined, average 1930-39, annual 1933-41

<sup>1</sup> Afloat or for early delivery.<sup>2</sup> Market closed.

Bureau of Agricultural Economics. Compiled in original currencies and units as follows: Canada—July 1930 to date, Minneapolis Daily Market Record. Monthly prices are averages of daily cash closing prices, in store at Fort William and Port Arthur. Argentina—Revista de la Bolsa de Cereales, Buenos Aires, weekly. Averages of daily prices described as follows: July 1, 1930-July 27, 1934, Barletta, for Brazil and/or consumption; July 28, 1934-Dec. 28, 1935, "Brazil"; January 3, 1936, to date, No. 2, semihard. Average of daily official market prices for merchandise of export grade. Australia—July 1930-June 1931, Statistical Register of New South Wales, annual; July 1931 to date, New South Wales Statistical Bulletin, Sydney, quarterly. No description given as to how monthly averages are computed. England—Broomhall's Corn Trade News, Liverpool, daily. Averages of daily sales prices of parcels at Liverpool. Beginning 1933, occasional "on sample" prices are excluded. Parcels are less than cargo lots.

Price converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board (Canadian and English prices converted at par prior to September 1931). Beginning September 1939, official buying rates of exchange used. Annual averages computed from monthly prices carried to 1 decimal. For earlier prices, see the 1930 Yearbook, table 22, and Agricultural Statistics, 1937, table 19.

<sup>1</sup> Estimates of seeded acreage relate to the total acreage of rye sown for all purposes, including an allowance for spring-sown rye.

<sup>2</sup> Prior to 1908 prices are as of Dec. 1.

<sup>3</sup> Prices are from Minneapolis Daily Market Record and are averages of daily prices weighted by carlot sales.

<sup>4</sup> Compiled from Commerce and Navigation of the United States, 1899–1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919–26, January and June issues, 1927–date, and official records of the Bureau of Foreign and Domestic Commerce. Rye—General imports, 1899–1909; imports for consumption, 1910–date. Rye flour—Imports for consumption, 1899–date. Rye flour converted to rye on the basis that 1 barrel of rye flour is the product of 6 bushels of grain.

<sup>5</sup> These figures do not include rye malt.

<sup>6</sup> Total exports (i. e., domestic plus foreign) minus total imports; beginning 1910 domestic exports minus imports for consumption.

<sup>7</sup> Net imports.

<sup>8</sup> Less than 500 bushels.

<sup>9</sup> Includes an allowance for unredeemed loans at average loan value.

<sup>10</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 34.

TABLE 29.—*Rye: Acreage and production (average 1930-39), and season average price per bushel received by farmers, by States, annual 1940 and 1941*

<sup>1</sup> Figures refer to the year of harvest. Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere countries in 1941 is combined with the Southern Hemisphere harvest which began late in 1941 and ended early in 1942.

<sup>2</sup> Includes all Russian territory reporting for the years shown.

<sup>3</sup> Exclusive of the 10 Vistula Provinces of Russian Poland and the Province of Batum in Transcaucasia.

<sup>4</sup> Exclusive of Russian Poland, Lithuania, parts of Latvia and the Ukraine, and the 2 Provinces of Batum and Elizabetpol in Transcaucasia.

<sup>5</sup> Beginning with this year, estimates for the present territory of the Union of Soviet Socialist Republics, exclusive of Turkestan, Transcaucasia, and the Far East, which territory in 1924 produced 8,646,000 bushels.

<sup>6</sup> Beginning with this year post-war boundaries; therefore, not comparable with earlier years.

<sup>7</sup> Since 1933 heavy harvesting losses have not been taken into account; production estimates have been adjusted downward 10-20 percent in U. S. S. R. and group totals.

<sup>8</sup> Includes Austria, Sudetenland and Memelland.

<sup>9</sup> Estimate of territory not included with Germany and Hungary.

<sup>10</sup> Preliminary.

<sup>11</sup> Unofficial.

<sup>1</sup> Does not include rye used for seed in those States for which production estimates of rye for grain are not made.

<sup>2</sup> Relates to quantities used on farms where produced. Additional quantities of purchased rye are so utilized.

<sup>3</sup> Preliminary.

Agricultural Marketing Service. Relates to disposition of the crop specified and not to disposition within the marketing year.

<sup>1</sup> Domestic rye in store in public and private elevators at terminal markets and rye afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> United States rye in store at Canadian points or afloat in vessels or barges in harbors of lake and seaboard ports, Friday nearest the 1st of the month.

<sup>3</sup> Canadian rye in Canada exclusive of farm stocks, Friday nearest the 1st of the month.

<sup>4</sup> Canadian rye in store and afloat at United States lake and seaboard ports, Saturday nearest the 1st of the month.

<sup>1</sup> Prior to 1924 prices are as of Dec. 1.<sup>2</sup> Year beginning July; in terms of rough rice.<sup>3</sup> Compiled from Commerce and Navigation of the United States, 1899–1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919–26; January and June issues, 1927 to date, and official records of the Bureau of Foreign and Domestic Commerce. Converted on the basis that 1 pound milled rice is equivalent to 1.62 pounds rough rice and 45 pounds rough rice equal 1 bushel.<sup>4</sup> The difference between the total exports (domestic exports plus reexports) and total imports. Beginning 1933, domestic exports and imports for consumption.<sup>5</sup> Shipments of rice not separately reported.<sup>6</sup> Net imports.<sup>7</sup> To Puerto Rico only, other shipments not reported.<sup>8</sup> Includes Virgin Islands beginning January 1935.<sup>9</sup> July–March inclusive; not published later.<sup>10</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. For earlier years, see Agricultural Statistics, 1941, table 127.

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, for 1939 the crop harvested in the Northern Hemisphere countries in 1939 is combined with the Southern Hemisphere harvest which began late in 1939 and ended early in 1940. Estimates of world rice production for the period 1900-08 appear in the 1924 Yearbook, table 138.

<sup>2</sup> Estimates of the American Consul General, Shanghai.

<sup>3</sup> Estimates of the production of rice on nonirrigated land are not available prior to 1917. Estimates for the years 1909-16, as given here, are for the production on irrigated land. Estimates for 1937-38 are for the total production.

<sup>4</sup> Estimated figures, obtained by multiplying acreage under "Rice," as classified for revenue purposes up to 1912, and acreage as reported by the Department of Land and Agriculture from 1912 on, by an average yield for the years 1920-23, for which years official estimates have been published of acreage, yield, and total production.

<sup>5</sup> Irrigated rice, which comprises between 90 and 95 percent of the total crop.

<sup>6</sup> Province of Laos not included.

<sup>7</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from official sources and International Institute of Agriculture.

## RICE

TABLE 45.—Rice: Acreage and production in specified countries, average 1930-31 to 1934-35, annual 1936-37 to 1941-42<sup>1</sup>

<sup>1</sup> California rough rice converted from bags to barrels on basis of 1.62 bags=1 barrel.<sup>2</sup> Southern States: Milled rice converted on basis of pounds of milled rice produced annually from 162-pound barrel of rough rice. In the 10 years 1931-40 an average of 106.65 pounds of milled rice (excluding brewers rice) was produced from 1 barrel of rough rice. California: Milled head rice converted to rough rice on basis of pounds of head rice produced annually from 162 pounds of rough rice. For 1930-32, the 8-year average 1933-40 of 79.575 pounds of head rice=1 barrel of rough rice was used; 1933 to date, the actual factor for each year was used.<sup>3</sup> Production converted on the basis of 1 bushel=45/162 barrel.<sup>4</sup> Imports of cleaned, brown, and uncleaned rice. Atlantic and Gulf ports included with southern States, and Pacific ports with California. Milled rice converted as in footnote 2.<sup>5</sup> Total southern supply includes receipts from California for 1936-40, 1,000 barrels as follows: 3, 65, 10, 16, and 13, respectively.<sup>6</sup> Supply without imports.<sup>7</sup> Negligible.<sup>8</sup> Stocks in 1930 and 1931 estimated by Bureau of Agricultural Economics.<sup>9</sup> Total California excludes shipments to southern mills for 1935-40, in 1,000 barrels, as follows: 4, 64, 10, 9, 7, and 13, respectively.<sup>10</sup> Total continental United States supply column is total of southern and California supply; see footnotes 5 and 9.

Bureau of Agricultural Economics. Compiled from data of the Agricultural Marketing Service and reports of Foreign and Domestic Commerce of the United States.

<sup>1</sup> Preliminary.<sup>2</sup> January only, last published data.<sup>3</sup> Prior to April 1937, foreign trade included with British India.<sup>4</sup> International Yearbook of Agricultural Statistics.<sup>5</sup> Year beginning April.<sup>6</sup> April-December; full year not available.<sup>7</sup> Not shown prior to 1932; included with data for China.<sup>8</sup> 3-year average.<sup>9</sup> Java and Madura only.<sup>10</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.<sup>11</sup> 4-year average.<sup>12</sup> January-April, last published data.<sup>13</sup> From Consular report No. 17,897.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. Mostly milled rice. Under rice is included paddy, unhulled, rough, milled, polished, broken, and cargo rice, in addition to rice flour and meal. Rice bran is not included. Rough rice, or paddy, where specifically reported, has been reduced to terms of milled rice at the ratio of 162 pounds of rough or unhulled to 100 pounds of milled. "Rice, other than whole or cleaned rice," in the returns of the United Kingdom is not considered paddy, since the chief sources of supply indicate that it is practically all hulled rice. Cargo rice, a mixture of hulled and unhulled, is included without being reduced to terms of milled. Broken rice and rice flour and meal are taken without being reduced to terms of whole milled rice.

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> Compiled from Monthly Summary of Foreign Commerce of the United States, and official records of the Bureau of Foreign and Domestic Commerce. Buckwheat, general imports 1925-30; imports for consumption, 1935 to date. Buckwheat flour converted to terms of grain on the basis that 1 barrel of flour is the product of 7 bushels of grain.<sup>3</sup> Less than 500 bushels.<sup>4</sup> Includes buckwheat flour 1922-25.<sup>5</sup> Not available on crop year basis prior to this date.<sup>6</sup> Net imports.<sup>7</sup> September-December 1929; not separately reported until 1935.<sup>8</sup> Imports for consumption beginning 1935.<sup>9</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 139.

<sup>1</sup> Does not include buckwheat used for seed in those States for which production estimates of buckwheat for grain are not made.

<sup>2</sup> Relates to quantities used on farms where produced. Additional quantities of purchased buckwheat are so utilized.

<sup>3</sup> Preliminary.

Agricultural Marketing Service. Relates to disposition of the crop specified and not to disposition within the marketing year.

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> Compiled from the Chicago Daily Trade Bulletin through May 1942; Chicago Journal of Commerce beginning June 1942; average of daily prices weighted by carlot sales, No. 3 yellow.<sup>3</sup> Compiled from Monthly Summary of Foreign Commerce of the United States, 1899-1940, and official records of the Bureau of Foreign and Domestic Commerce. Corn—General imports 1899-1908 and 1911-32; imports for consumption beginning 1933. Exports, domestic, 1899 to date; reexports 1926-30. Corn meal—imports and reexports not separately reported 1899-1932, imports reported beginning 1933; domestic exports 1899 to date. Corn meal converted to terms of grain on the basis of 4 bushels of corn to barrel of meal.<sup>4</sup> Total exports (domestic plus foreign) minus total imports. Beginning 1933 net exports are domestic exports minus imports for consumption.<sup>5</sup> Corn harvested for grain; acreage harvested for grain in 1924 is 82,329,000 acres; 1929, 83,162,000 acres; 1934, 62,247,000 acres.<sup>6</sup> Net imports—i. e., total imports minus total exports (domestic plus foreign). Beginning 1933 net imports are imports for consumption minus domestic exports.<sup>7</sup> Includes an allowance for unredeemed loans at average loan value.<sup>8</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 49.

TABLE 63.—*Corn: Acreage, yield, and production (average 1930-39), and season average price per bushel received by farmers, by States, annual 1940 and 1941*

| State and division  | Acreage harvested |             |                   | Yield per acre  |      |                   | Production      |           |                   | Price <sup>2</sup> for crop of— |                   |

<sup>1</sup> Figures refer to year of harvest. Harvests of the Northern Hemisphere are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in Northern Hemisphere countries in 1941 is combined with the Southern Hemisphere harvest which began late in 1941 and ended early in 1942. Estimated totals and subtotals include approximations for countries not shown, and in the case of Africa for native cultivation not reported.

<sup>2</sup> Preliminary.

<sup>3</sup> 1 year only.

<sup>4</sup> Unofficial.

<sup>5</sup> 3-year average.

<sup>6</sup> Figures somewhat incomplete in early years.

<sup>7</sup> 4-year average.

<sup>8</sup> Production estimated by South Manchurian Railway, except as noted.

<sup>9</sup> Estimated by United States Agricultural Attaché, Shanghai.

<sup>10</sup> Incomplete.

<sup>11</sup> Calculated by the International Institute of Agriculture, Rome.

<sup>12</sup> Planted acreage, less average abandonment.

<sup>13</sup> 2-year average.

Office of Foreign Agricultural Relations. Compiled from official sources and International Institute of Agriculture.

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, for 1940 the crop harvested in the Northern Hemisphere countries in 1940 is combined with the Southern Hemisphere harvest which took place early in 1941.

<sup>2</sup> Bulgaria, Hungary, Rumania, and Yugoslavia.

<sup>3</sup> Through 1913 estimates are for the total Russian Empire.

<sup>4</sup> Total Russian Empire, exclusive of the 10 Vistula Provinces of Russian Poland and the Province of Batum in Transcaucasia.

<sup>5</sup> Exclusive of Russian Poland, Lithuania, parts of present Latvia and the Ukraine, and the Provinces of Batum and Elizabetpol in Transcaucasia.

<sup>6</sup> Beginning this year, estimates within present boundaries of the Union of Soviet Socialist Republics, exclusive of Turkestan, Transcaucasia, and the Far East, which territory in 1924 produced 26,048,000 bushels.

<sup>7</sup> Beginning this year, production in present boundaries, and therefore not comparable with that of earlier years.

<sup>8</sup> Preliminary.

<sup>9</sup> Unofficial.

<sup>1</sup> The cost figures are based on average-per-acre yields of corn for grain, and on prevailing cost rates for labor, farm power, materials, equipment, and land rent.

<sup>2</sup> Yield per acre is a weighted average.

<sup>3</sup> Includes the 6 New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Kentucky, and Tennessee.

<sup>4</sup> Includes North Carolina, South Carolina, Georgia, Florida, Alabama, and Mississippi.

<sup>5</sup> Includes Arkansas, Louisiana, Oklahoma, and Texas.

<sup>6</sup> Includes Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, and California.

Bureau of Agricultural Economics. See further details in table 744.

<sup>1</sup> Estimated quantities (based on census data) used in making corn meal, flour, and hominy grits during the calendar year following the corn harvest. For example, the 51,810,000 bushels of corn in the first line of this column is corn used during the calendar year 1927.

<sup>2</sup> 1926-33, year beginning July; 1934-40, year beginning October. Compiled from Bureau of Internal Revenue data.

<sup>3</sup> Starch, sirup, sugar, etc. Compiled from data of the Corn Refiners' Statistical Bureau.

<sup>4</sup> Estimated quantities (based on census data) used in making prepared breakfast foods during the calendar year following the corn harvest. For example, the 8,385,000 bushels of corn in the first line of this column is corn used during the calendar year 1927.

<sup>5</sup> Data of the Agricultural Marketing Service.

<sup>6</sup> Estimated on basis of acreage seeded.

<sup>7</sup> Residual figures.

<sup>8</sup> From reports of Bureau of Foreign and Domestic Commerce.

<sup>9</sup> Net imports.

<sup>10</sup> Preliminary.

Bureau of Agricultural Economics.

<sup>1</sup> Domestic corn in store in public and private elevators at terminal markets and corn afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> United States corn in store at Canadian points or afloat in vessels or barges in harbors of lake and seaboard ports, Friday nearest the 1st of the month.

Agricultural Marketing Service. United States corn in Canada from Canadian Bureau of Statistics.

<sup>1</sup> Includes an allowance for unredeemed loans at average loan value.

<sup>2</sup> Preliminary.

Agricultural Marketing Service; based on returns from special price reporters. Monthly prices, by States, weighted by production to obtain monthly prices for the United States. Season average prices for each State based on monthly prices weighted by estimates of monthly sales during the crop-marketing season. Season average prices, by States, weighted by production to obtain United States season average.

<sup>1</sup> Average for Dec. 2-4.

<sup>2</sup> Market closed.

<sup>3</sup> No quotations after December 1940.

<sup>4</sup> Average for months shown.

Bureau of Agricultural Economics. Compiled in original currencies and units as follows: Buenos Aires—Revista de la Bolsa de Cereales, Buenos Aires, weekly. Averages of daily official market prices for merchandise of export grade. New crop used beginning Apr. 1. Liverpool—Broomhall's Corn Trade News, Liverpool, weekly. Averages of Wednesday quotations. Price series converted to cents per bushel of 57 pounds at current monthly rates of exchange as reported by the Federal Reserve Board (Liverpool series converted at par prior to September 1931). Annual averages compiled from monthly prices carried to 1 decimal. Data for earlier period in 1930 Yearbook, tables 61 and 62, and Agricultural Statistics, 1936, table 47.

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> Compiled from Chicago Daily Trade Bulletin, through May 1942; Chicago Journal of Commerce beginning June 1942; average of daily quotations for No. 3 white, weighted by carlot sales; 1921 crop year to date, changed to July-June basis.<sup>3</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June issues, 1927-date; and official records of the Bureau of Foreign and Domestic Commerce. Oats—general imports, 1899-1932, imports for consumption beginning 1933; oatmeal—general imports, 1899-1909; imports for consumption 1910-date.<sup>4</sup> Total exports (domestic plus foreign) minus total imports. Beginning 1933 net exports are domestic exports minus imports for consumption.<sup>5</sup> Net imports. Total imports minus total exports (domestic plus foreign). Beginning 1933 net imports are imports for consumption minus domestic exports.<sup>6</sup> Less than 0.05 percent.<sup>7</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 75.

TABLE 87.—Oats: Acreage, yield, and production (average 1930-39), and season average price per bushel received by farmers, by States, annual 1940 and 1941

| State and division  | Acreage harvested      |                        |                        | Yield per acre     |            |                   | Production           |                      |                      | Price for crop of— |                   |

| 1941 <sup>9</sup>            | 1,176                  |                          |                        | 368                    |                        |                        |                        | 31                     | 2,318                    | 4,042                  |

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, for 1940 the crop harvested in the Northern Hemisphere countries in 1940 is combined with the Southern Hemisphere harvest which began late in 1940 and ended early in 1941.

<sup>2</sup> Through 1913, estimates are for the total Russian Empire.

<sup>3</sup> Total Russian Empire, exclusive of the 10 Vistula Provinces of Russian Poland and the Province of Batum in Transcaucasia.

<sup>4</sup> Exclusive of Russian Poland, Lithuania, parts of present Latvia and the Ukraine, and the Provinces of Batum and Elizabetpol in Transcaucasia.

<sup>5</sup> Beginning this year, estimates for the present territory of the Union of Soviet Socialist Republics, exclusive of Turkestan, Transcaucasia, and the Far East, which territory in 1924 produced 20,248,000 bushels.

<sup>6</sup> Beginning this year, post-war boundaries, and therefore not comparable with earlier years.

<sup>7</sup> Beginning this year, official estimates, but figures may not be strictly comparable with those for previous years.

<sup>8</sup> Including Sudetenland and Memel.

<sup>9</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from official sources and International Institute of Agriculture.

<sup>1</sup> Relates to quantities used on farms where produced. Additional quantities of purchased oats are so utilized.

<sup>2</sup> Includes oats sold to other farmers for livestock feed, as well as oats sold for commercial utilization.

<sup>3</sup> Preliminary.

Agricultural Marketing Service. Relates to disposition of the crop specified and not to disposition within the marketing year.

<sup>1</sup> Domestic oats in store in public and private elevators at terminal markets and oats afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> United States oats in store at Canadian points or afloat in vessels or barges in harbors of lake and seaboard ports, Friday nearest the 1st of the month.

<sup>3</sup> Canadian oats in Canada exclusive of farm stocks, Friday nearest the 1st of the month.

<sup>4</sup> Canadian oats in store and afloat at United States lake and seaboard ports, Saturday nearest the 1st of the month.

Agricultural Marketing Service. United States and Canadian oats in Canada from Canadian Bureau of Statistics.

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> From Bureau of Labor Statistics, wholesale price bulletins—monthly quotations, August 1919-September 1927, Fair to Good malting. Beginning October 1927, grade reported as feeding, but as quality remained unchanged, no change was made in comparative prices; beginning August 1934 price changed to barley No. 2 malting, at Minneapolis.<sup>3</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June issues, 1927-39; and official records of the Bureau of Foreign and Domestic Commerce. Malt converted to terms of barley on the basis that 1.1 bushels of malt is the product of 1 bushel of barley. Barley flour converted on the basis that 1 barrel of flour is the product of 9 bushels of barley.<sup>4</sup> Barley flour not reported prior to 1918.<sup>5</sup> Barley—general imports 1899-1908, imports for consumption beginning 1909. Malt—general imports 1899-1913; imports for consumption beginning 1914. Flour not reported prior to 1914; imports for consumption beginning 1915.<sup>6</sup> The difference between total exports (i. e., domestic exports plus reexports) and total imports.<sup>7</sup> Average for 11 months.<sup>8</sup> Net imports, i. e., total imports minus total exports (domestic exports plus reexports). Beginning 1933, net imports are imports for consumption minus domestic exports.<sup>9</sup> Includes an allowance for unredeemed loans at average loan value.<sup>10</sup> Preliminary.Agricultural Marketing Service and Bureau of Agricultural Economics. *Italic figures are census returns.* For earlier years, see Agricultural Statistics, 1941, table 94.

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, for 1939 the crop harvested in the Northern Hemisphere countries in 1939 is combined with the Southern Hemisphere harvest which began late in 1939 and ended early in 1940.

<sup>2</sup> Through 1913 estimates are for the total Russian Empire.

<sup>3</sup> Morocco, Algeria, Tunisia, and Egypt.

<sup>4</sup> Total Russian Empire, exclusive of the 10 Vistula Provinces of Russian Poland and the Province of Batum in Transcaucasia.

<sup>5</sup> Exclusive of Russian Poland, Lithuania, parts of present Latvia and the Ukraine, and the Provinces of Batum and Elizabetpol, in Transcaucasia.

<sup>6</sup> Beginning this year, estimates for the present territory of the Union of Soviet Socialist Republics, exclusive of Turkestan, Transcaucasia, and the Far East, which territory in 1924 produced 20,897,000 bushels.

<sup>7</sup> Beginning this year, production in present boundaries and therefore not comparable with that of earlier years.

<sup>8</sup> Beginning this year, official estimates, but figures may not be strictly comparable with those for previous years.

<sup>9</sup> Unofficial estimate.

<sup>10</sup> Including Sudetenland and Memel.

<sup>11</sup> Production for Morocco estimated.

<sup>12</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from official sources and International Institute of Agriculture.

TABLE 106.—Barley: Acreage, yield per acre, and production in specified countries, year of harvest, averages 1925-29 and 1930-34, annual 1939-41

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, for 1940 the crop harvested in the Northern Hemisphere countries in 1940 is combined with the Southern Hemisphere harvest which began late in 1940 and ended early in 1941.

### 2 Preliminary.

: Unofficial estimate.

† Including Sudetenland and Memel.

Bohemia and Moravia.

<sup>6</sup> Slovakia.

<sup>7</sup> New boundaries.

<sup>8</sup> 4-year average.

15 provinces of Unoccupied China.

<sup>10</sup> 3-year average.

Bureau of Agricultural Economics.  
Institute of Agriculture.

<sup>1</sup> Relates to quantities used on farms where produced. Additional quantities of purchased barley are so utilized.

<sup>2</sup> Includes barley sold to other farmers for livestock feed, as well as barley sold for commercial utilization.

<sup>3</sup> Preliminary.

Agricultural Marketing Service. Relates to disposition of the crop specified and not to disposition within the marketing year.

<sup>1</sup> Domestic barley in store in public and private elevators at terminal markets and barley afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> United States barley in store at Canadian points or afloat in vessels or barges in harbors of lake and seaboard ports, Friday nearest the 1st of the month.

<sup>3</sup> Canadian barley in Canada exclusive of farm stocks, Friday nearest the 1st of the month.

<sup>4</sup> Canadian barley in store and afloat at United States lake and seaboard ports, Saturday nearest the 1st of the month.

Agricultural Marketing Service. United States and Canadian barley in Canada from Canadian Bureau of Statistics.

<sup>1</sup> Comprises bran and pollards (of wheat and rye), wheat feed flour, shorts, and middlings, when reported.

<sup>2</sup> Preliminary.

<sup>3</sup> January-June, last published data.

<sup>4</sup> Year beginning July of year previous to that shown.

<sup>5</sup> Less than one-half ton.

<sup>6</sup> Imports all years and exports 1937 to date are for all bran; (includes peanut, rice, babassu, cottonseed, linseed, castor bean, sesame and unclassified.)

<sup>7</sup> January only, last published data.

<sup>8</sup> January-April, last published data.

<sup>9</sup> January-March, last published data.

<sup>1</sup> For 1909 to 1926 inclusive the acreage figures relate to June 25 instead of July 1.

<sup>2</sup> Department figures are in 500-pound gross-weight bales for all years. Agricultural census figures for all periods are in running bales.

<sup>3</sup> Prior to 1908 prices are as of Dec. 1.

<sup>4</sup> Computed from lint production, assuming 65 pounds of cottonseed for each 35 net pounds of lint.

<sup>5</sup> New York prices 1899 to August 1900, Commercial and Financial Chronicle, average of daily quotations; beginning 1900 from reports of the New York Cotton Exchange except Aug. 1-Nov. 16, 1914, when the Exchange was closed (prices for this period from the Commercial and Financial Chronicle). New Orleans prices were from same sources prior to Aug. 16, 1915; since which date, from reports of the New Orleans Cotton Exchange direct to this Service. These central market prices are for middling grade, 7/8-inch staple, through 1939; beginning August 1940, prices are for 1 1/8-inch staple.

<sup>6</sup> Excluding linters beginning 1914.

<sup>1</sup> Theoretically these estimates all include the total cotton production in each country. They are frequently referred to as estimates of the "agricultural crop" to distinguish them from estimates of the "commercial crop" (table 146) which excludes that cotton consumed on hand spindles or in other ways, without entering commercial channels. These estimates, therefore, should average larger than the estimates of the commercial crop. Because of inaccuracies in some of the available estimates, however, this is not always true. Differences from year to year between these 2 series of production estimates for a given country, and in turn the total for all foreign countries, may also occur for 2 other reasons: (1) Because of changes in stocks of cotton on hand at the beginning and end of the cotton-marketing season (which changes are used in estimating the production of commercial cotton in many foreign countries), and (2) because of changes in the quantity of cotton from a given "agricultural crop" which is ginned or marketed within a given marketing season.

<sup>2</sup> Excludes Burma.

<sup>3</sup> Includes Manchuria.

<sup>4</sup> Bales of 478 pounds net weight.

<sup>5</sup> Comparable data not available.

<sup>6</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from official sources, International Institute of Agriculture, and estimates of the Bureau of Agricultural Economics.

Footnotes (continued from page 100).

<sup>7</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June and July 1919-40, and January 1927-40.

<sup>8</sup> Bales of 500 pounds gross weight.

<sup>9</sup> Bales of 478 pounds net, which are equivalent to bales of 500 pounds gross weight.

<sup>10</sup> Average for 9 months only. Exchange closed Aug. 1-Nov. 16, on account of war.

<sup>11</sup> Acreage in cultivation July 1 less removal of acreage reported by the Agricultural Adjustment Administration, less abandonment on area not under contract.

<sup>12</sup> Includes unredeemed loan cotton at average loan value.

<sup>13</sup> Includes imports for consumption, beginning January 1934, reexports not considered beginning this date.

<sup>14</sup> Beginning August 1940, prices are for 1½-inch staple.

<sup>15</sup> Preliminary.

<sup>16</sup> Season average price to April 1.

Agricultural Marketing Service and Bureau of Agricultural Economics. Agricultural census figures in italics. Production figures conform with census annual ginning enumerations, with allowance for cross-State ginnings. State figures rounded to thousands and added for United States total. Cotton grown in Baja California, ginned in California, from 1913 to 1924 has been excluded. For earlier years, see Agricultural Statistics, 1941, table 151.

| Estimated world total <sup>15</sup> ..... |   | 79,530,000 | 76,350,000 | 72,750,000 | 76,875,000 | 76,410,000 | 27,150,000 | 25,836,000 | 29,100,000 | 29,000,000 | 30,440,000 |
|   |   | 84,410,000 |            |            |            |            |            |            |            |            | 28,230,000 |

<sup>1</sup> Theoretically these estimates represent total cotton acreage and production in each country, including cotton consumed on hand spindles or in other ways without entering commercial channels. For this reason they should average somewhat larger than estimates of the "commercial crop" (see table 146). Estimates for many of the minor producing countries are obtained from unofficial sources, where official estimates are not available.

<sup>2</sup> The years shown here refer to that cotton marketing season in which the greatest part of the crop in each country is harvested.

<sup>3</sup> United States production in bales of 500 pounds gross weight; others in bales of 478 pounds net.

<sup>4</sup> Exports.

<sup>5</sup> 2-year average.

<sup>6</sup> Comparable data not available.

<sup>7</sup> Estimate for 1 year.

<sup>8</sup> 4-year average.

<sup>9</sup> Acreage figures for Java and Madura only.

<sup>10</sup> Includes Manchuria.

<sup>11</sup> Acreage figures for Java and Madura only.

<sup>12</sup> 4-year average.

<sup>13</sup> Includes Senegal, Ivory Coast, Dahomey, French Sudan, French Guinea, Niger Territory, and part of Upper Volta.

<sup>14</sup> A valuable information has been conflicting and is difficult to reconcile. Recent reports on cotton production in the Union of Soviet Socialist Republics suggest that the estimates for 1937, 1938, and 1939 may have been too high.

<sup>15</sup> Includes estimates of 5,000 to 10,000 bales and 20,000 to 40,000 acres distributed among the sub-totals for minor producing areas not listed above. Sub-totals are calculated by including an allowance for each missing estimate, based on incomplete data or averages for recent years.

Office of Foreign Agricultural Relations. Compiled from official sources, International Institute of Agriculture, credible trade sources, and estimates by this Office.

TABLE 139.—Cotton: Acreage, yield, and production of lint in 500-pound gross-weight bales, production of seed in tons (average 1930-39), and season average price received by farmers, by States, annual 1940 and 1941

<sup>1</sup> Preliminary.<sup>2</sup> Includes unredeemed loan cotton at average loan value.<sup>3</sup> Season average price to April 1.<sup>4</sup> Computed from lint production, assuming 66 pounds of cottonseed for each 35 net pounds of lint.<sup>5</sup> Prices are State averages weighted by production to obtain United States average, rather than by sales as in table 133.<sup>6</sup> Included in State and United States totals. Sea Island grown principally in Georgia and Florida. American Egyptian grown principally in Arizona.<sup>7</sup> Not included in California figures, nor in United States total.

Agricultural Marketing Service. Cotton production figures conform with census annual ginning enumerations, with allowance for cross-State ginnings. State figures rounded to thousands and added for United States total.

<sup>1</sup> The cost figures are based on average per-acre yields of cotton lint (gross weight), and on prevailing cost rates for labor, farm power, materials, equipment, and land rent.

<sup>2</sup> Obtained by dividing the production of lint in terms of 500-pound bales by the acreage harvested.

<sup>3</sup> Includes the lower and upper Coastal Plain of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and the black prairie belt of Alabama and Mississippi.

<sup>4</sup> Includes the rolling and hilly uplands of Virginia, North Carolina, South Carolina, Georgia, and Alabama, which border the Blue Ridge Mountains on the east and south.

<sup>5</sup> Includes Tennessee exclusive of Lake County, the hilly cotton lands of northern Mississippi, northern Alabama, and northern Georgia, and western North Carolina.

<sup>6</sup> Includes the principal bottom lands of the Mississippi, Arkansas, and Red Rivers.

<sup>7</sup> Includes the hilly lands of Arkansas, Louisiana, southern Missouri, eastern Texas, and eastern Oklahoma.

<sup>8</sup> Includes the Gulf coast prairie of Texas and Louisiana, and the black wavy prairie of Texas.

<sup>9</sup> Includes the dry-land areas of western Oklahoma, western Texas, and eastern New Mexico.

<sup>10</sup> Includes the irrigated cotton lands of California, Arizona, New Mexico, and Texas.

<sup>11</sup> Includes the 16 States of Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Tennessee, Mississippi, Louisiana, Arkansas, Missouri, Oklahoma, Texas, New Mexico, Arizona, and California.

Bureau of Agricultural Economics. See further details in table 745.

TABLE 141.—Cotton: Estimated average cost per bale to farmers for ginning cotton (including bagging and ties), by States, 1923-24 to 1940-41<sup>1</sup>

| Kind of cotton and State | 1923-24 | 1924-25 | 1925-26 | 1926-27 | 1927-28 | 1928-29 | 1929-30 | 1930-31 | 1931-32 | 1932-33 | 1933-34 | 1934-35 | 1935-36 | 1937-38 | 1938-39 | 1939-40 | 1940-41 |
|--------------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|---------|

| AMERICAN-EGYPTIAN        | 17.21   | 17.21   | 17.21   | 17.21   | 17.21   | 17.21   | 17.21   | 16.34   | 11.06   | 11.38   | 12.56   | 12.50   | 12.72   | 13.50   | 12.36   | 11.14   | 10.64   |
| Average <sup>3</sup>     | 6.00    | 5.99    | 6.00    | 5.99    | 5.92    | 5.99    | 5.77    | 5.07    | 4.05    | 4.35    | 4.77    | 5.07    | 5.04    | 4.89    | 4.73    | 4.69    | 4.78    |

<sup>1</sup>Equivalent bales of 500 pounds gross weight.<sup>2</sup>Includes service charge for sterilizing cottonseed in connection with pink bollworm control measures.<sup>3</sup>In addition to upland and American-Egyptian cotton, small quantities of sea-island cotton are produced. The production is too small, however, to affect the United States average ginning rate.

Agricultural Marketing Service and Bureau of Agricultural Economics.

<sup>1</sup> A small percentage for July is included in August.<sup>2</sup> Remainder of 1933 crop was sold between Aug. 1, 1934 and July 31, 1935.<sup>3</sup> Government loan cotton unredeemed prior to the end of the crop season is credited to sales in the month in which loans were granted. Redeemed loan cotton is credited in the month in which it was redeemed.<sup>4</sup> Excludes unredeemed loan cotton and cotton still in producers' hands on April 1.<sup>5</sup> Preliminary.

<sup>1</sup> Ginnings during the 12 months, August 1 through July 31. Excludes cotton from current crop ginned prior to August 1 and includes cotton from the next crop ginned prior to August 1 of the following year. Includes an allowance for "city crop" which consists of rebaled samples and pickings from cotton damaged by fire and weather.<sup>2</sup> Total imports minus reexports.<sup>3</sup> Total exports minus reimports except for the figures prior to 1919 which are total exports<sup>4</sup> New York Cotton Exchange Service.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census.

American in running bales, counting round bales as half bales; foreign cotton in bales of 500 pounds.

<sup>1</sup> Actual bales, instead of thousands.<sup>2</sup> Includes cotton distributed by the Surplus Marketing Administration through various cotton-matress programs.

Agricultural Marketing Service. Compiled from reports of the Bureau of the Census. Data for earlier years in 1932 Yearbook, table 34. Quantities are in running bales (round bales counted as half bales) and foreign in 500-pound bales.

<sup>1</sup> Includes only raw cotton produced for factory consumption and does not include large quantities grown in India and China and to some extent in other countries for consumption on hand spindles or for use in other noncommercial ways. For this reason, and because of differences in the methods of determining the quantities involved and differences in bale weights in the case of American, the estimates of the production of commercial cotton do not agree with the estimates of what might be called the "agricultural crop." The latter estimates (table 137) are in all cases given in bales of approximately 478 pounds net and are comparable with the estimates of acreage and yield.

<sup>2</sup> American in running bales (counting round bales as half bales); foreign, in bales of approximately 478 pounds net.

<sup>3</sup> Preliminary.

<sup>4</sup> Excludes Burma.

<sup>5</sup> Includes the cotton destroyed; it is estimated that from 18,000 to 183,000 bales of American were destroyed each year in the seasons shown here, and 100,000 bales of "sundries" destroyed in 1937-1938 and 1940-41 and 69,000 bales in 1939-40.

Bureau of Agricultural Economics. Compiled from reports of the New York Cotton Exchange Service.

TABLE 147.—Cotton: Carry-over, crop, supply, and disappearance of American upland, by grade, United States, 1931-41

<sup>1</sup> Tenderable in settlement of futures contracts made subject to section 5 of the United States Cotton Futures Act, the regulations of the Secretary of Agriculture thereunder, and according to bylaws and rules of Cotton Futures Exchanges.

<sup>2</sup> Carry-over as of Aug. 1.

<sup>3</sup> Running bales; round bales counted as half bales.

<sup>4</sup> Contains a limited number of bales reduced in grade and/or length and non-rain-grown cotton below Middling (White or Extra White) and shorter than 1½ inches, which is untenderable on futures contracts.

Agricultural Marketing Service.

<sup>1</sup> Less than 50,000 bales.

<sup>2</sup> Adjusted from figure shown in prior issues of Agricultural Statistics.

Commodity Exchange Administration.

(Footnotes for table 159.)

<sup>1</sup> August 1931-August 1932, Oomra, Fine, Basis F. Berar.

<sup>2</sup> Estimated by comparing with other varieties and/or grades.

<sup>3</sup> August 1931-December 1932 described only as Tungchow.

<sup>4</sup> Average for 9 years.

<sup>5</sup> Average for months shown.

Bureau of Agricultural Economics. Compiled in original currencies and units as follows: Indian—August 1931-August 1932, Bombay Cotton Annual; September 1932-March 1941, The Financial News, Bombay, weekly; from April 1941 to date, New York Cotton Exchange reports. Monthly averages described as follows: August 1931-August 1932, daily spot or near futures quotations; September 1932-October 1940, Wednesday or Thursday spot quotations; November 1940 to date, Friday, near futures quotations. Series converted from rupees per candy of 784 pounds to cents per pound at current monthly rates of exchange.

Chinese—August 1931-December 1932, An Analysis of Shanghai Commodity Prices, Shanghai, 1933 ("monthly average" prices); January-December 1933, Shanghai Market News Report, Shanghai, quarterly (averages of 1st and 15th of month); March-April 1934, Chinese Economic Bulletin, Shanghai, weekly; May 1934 to date, Prices and Price Indexes in Shanghai, monthly (prices for 15th of month). When not available, cables from the Agricultural Commissioner at Shanghai have been used. Series converted as follows: August 1931-December 1932, from Shanghai taels per picul of 133½ pounds to cents per pound at current monthly rates of exchange; January 1933-April 1934, from Chinese dollars per picul at current monthly exchange; May-June 1934, from Chinese dollars per picul at 15th of month exchange; July 1934 to date, from Chinese dollars per 50 kilograms at 15th of month exchange rates.

Egyptian—Monthly Bulletin of Agricultural and Economic Statistics, Cairo. Monthly averages are averages of daily prices. Series converted from tallaris per cantar of 99.048 pounds to cents per pound (1 tallari—one-fifth of an Egyptian pound) at current monthly rates of exchange. Beginning Sept. 5, 1939, converted at the rate of 97½ Egyptian pounds to the official rate for 100 pounds sterling.

Brazilian—August 1931-December 1934, Relatório da Diretoria, Contas, Documentos, e Parecer da Comissão Fiscal, Bolsa de Mercadorias de São Paulo, annual; January 1935 to date, monthly reports of the American consul general at São Paulo. Monthly averages described as follows: August 1931-December 1932, average of maximum and minimum; January 1933-December 1934, monthly average as published (apparently an average of daily quotations); January 1935 to date, average of daily buyers' and sellers' quotations. Series converted from milreis per 15 kilograms to cents per pound at current monthly average rates of exchange as follows: August 1930-Sept. 10, 1934, official rates; Sept. 10, 1934-Feb. 11, 1935, free market rates; Feb. 11, 1935-Oct. 14, 1937, composite averages of official (35 percent) and free market (65 percent) rates; Oct. 14-Nov. 13, 1937, composite averages of official (20 percent) and free market (80 percent) rates; Nov. 13, 1937-Apr. 10, 1939, free market rates; Apr. 10, 1939, to date, composite averages of official (30 percent) and free market (70 percent) rates.

Data for earlier years in Agricultural Statistics, 1937, table 121.

<sup>1</sup> Preliminary.<sup>2</sup> Beginning 1934, imports for consumption.<sup>3</sup> Beginning April 1937, foreign trade of Burma not included.<sup>4</sup> January only, last published data.<sup>5</sup> January-July only, last published data.<sup>6</sup> International Yearbook of Agricultural Statistics.<sup>7</sup> Trade with Egypt included in Egyptian figures.<sup>8</sup> Year beginning Mar. 21, 1925-30; year beginning June 22, 1931-38; year beginning Mar. 21, 1939, to date.<sup>9</sup> June 22, 1938, to Mar. 21, 1939, full year not available.<sup>10</sup> January-March, last published data.<sup>11</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.<sup>12</sup> April-December, full year not available.<sup>13</sup> January-April, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. Bales of 500 pounds gross weight or 478 pounds net. The figures for cotton refer to ginned and unginned cotton but do not include linters, mill waste, cotton batting, scarto (Egypt and Sudan), when separately stated. Wherever unginned cotton has been separately stated in the original reports, it has been reduced to ginned cotton in this statement at the ratio of 3 pounds unginned to 1 pound ginned.

TABLE 164.—Cottonseed: Production, farm disposition, season average price per ton received by farmers, and value, by States, 1940 and 1941

1940

| 1940                       | 706                         | 1,208                       | 252                         | 2,166                       | 1,359                       | 21                          | 1                           | 5.31                         | 4.19       | 3.13       |
| 1941 <sup>4</sup>          | 787                         | 1,184                       | ( <sup>5</sup> )            | <sup>6</sup> 1,971          | 1,494                       | ( <sup>5</sup> )            | 4                           | 9.83                         | 7.20       | 3.50       |

<sup>1</sup> When stocks on hand at the end of the year are added to figures on distribution, the total slightly exceeds figures on total supply.

<sup>2</sup> Uncompressed in carload lots, f. o. b. mill points.

<sup>3</sup> Bales are running bales except imports which are 500-pound bales.

<sup>4</sup> Preliminary.

<sup>5</sup> Data no longer published.

<sup>6</sup> Domestic supply.

Agricultural Marketing Service. Supply and distribution figures compiled from reports of the Bureau of the Census and Bureau of Foreign and Domestic Commerce.

<sup>1</sup> Year beginning Sept. 1, 1911-13; year beginning Aug. 1, 1914, to date.

<sup>2</sup> Apparel and carpet wool, reduced to scoured basis; production plus net imports, 1911-17; consumption, 1918 to date, on calendar-year basis.

<sup>3</sup> Net imports, 1911-33; imports for consumption, 1934 to date, on calendar-year basis.

<sup>4</sup> From Rayon Organon. Includes filament yarn and staple fiber. Calendar-year basis. <sup>5</sup> Preliminary.

Bureau of Agricultural Economics. Calendar-year figures divided by July 1 population estimates to get per capita figures. Crop-year figures (for cotton) divided by Jan. 1 population estimates to get per capita figures.

| 1939.....               | 55,271                   | 2.723                        | 379,939                 | 46,634                   | 458,465                          | .515                         | .465        |
| 1940.....               | 47,600                   | 2.786                        | 471,170                 | 15,440                   | 487,563                          | .530                         | .480        |
| 1941 <sup>8</sup> ..... | <sup>9</sup> 23,783      | 2.933                        | -----                   | <sup>9</sup> 8,017       | 586,000                          | .536                         | .483        |

<sup>1</sup> Net imports are imports minus reexports; beginning 1934 imports for consumption.<sup>2</sup> Average of monthly average prices of Japanese silk, double extra 13-15, 78 percent white, at New York. Basis for trading on New York Raw Silk Exchange.<sup>3</sup> Includes yarn and staple fiber.<sup>4</sup> Net imports are imports minus exports (domestic and foreign); beginning 1934 imports for consumption minus domestic exports. Imports are mostly staple fiber.<sup>5</sup> Consumption of rayon yarn includes domestic yarn shipments and yarn imports; consumption of staple fiber includes production and imports.<sup>6</sup> Average of monthly average prices of domestic yarn, first quality. The count indicates the number of deniers or 1/2-decigram units, in weight, of a standard length of 450 meters. Since the standard is based on an arbitrary fixed length and a variable weight, the finer the yarn the smaller the count; 150-denier count, a size commonly used, is fine and 300-denier count is coarse.<sup>7</sup> Net exports.<sup>8</sup> Preliminary.<sup>9</sup> 9 months, ending Sept. 30, 1941.

Bureau of Agricultural Economics. Compiled as follows:

Net imports from Foreign Commerce and Navigation of the United States.

Prices from bulletins of the United States Bureau of Labor Statistics.

Production and consumption of rayon from the Rayon Organon.

TABLE 168.—*Rayon: Production in selected countries and total, 1910-41*

<sup>1</sup> Probably some production; amount unknown or unreported.<sup>2</sup> Credited to Germany.<sup>3</sup> Preliminary.

Agricultural Marketing Service. Compiled from the Rayon Organon of the Textile Economics Bureau, Inc. Rayon is defined as "a man-made textile with a cellulose base." The comparatively small production of Lanital, Nylon, Vinyon, and other synthetic fibers, which are made basically from substances other than cellulose, is excluded.

<sup>1</sup> Unmanufactured jute consists of jute and jute butts. Jute fibers are spun into yarns by domestic mills for use in twine and cordings, carpets, webbing, and various other products. Jute butts are spun into coarse yarns, principally for use in bagging for cotton bales.

<sup>2</sup> Burlap is woven fabric, used chiefly in the manufacture of bags and bagging materials.

<sup>3</sup> Other manufactured jute imported for consumption includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.

<sup>4</sup> All import figures compiled from Foreign Commerce and Navigation of the United States and from reports of the United States Tariff Commission. In some instances import statistics have been converted from yards to pounds on the basis of average weights and some are rough approximations.

<sup>5</sup> Prices for raw jute are for medium grades, compiled from reports of the Bureau of Labor Statistics.

<sup>6</sup> Official sources. About 98 percent of total world production is in India, principally Bengal. Other countries producing a small quantity of jute are Nepal, Formosa, Iran, Japan, and Indochina.

<sup>7</sup> Preliminary.

<sup>8</sup> Not available.

Agricultural Marketing Service and the Bureau of Agricultural Economics.

<sup>1</sup> Seed production chiefly from fall plantings overwintered in the field.

<sup>2</sup> In 1938, a total of 34 acres of trial plantings in Oregon produced 52,340 pounds of seed (included with "Colorado and other States").

<sup>3</sup> Commercial production in Colorado, Texas, Washington, and experimental plantings in Tennessee and Idaho. Seed production in Colorado in part from stocklings grown in June or July plantings, overwintered in pit silos; production in other States from fall plantings overwintered in the field. 160 acres were grown in Colorado with average production of 1,527 pounds per acre; 225 acres were grown in Washington with average production of 1,165 pounds per acre.

<sup>4</sup> The curly-top-resistant varieties are chiefly those released by the Bureau of Plant Industry, U. S. Department of Agriculture. These figures are included in the total of "all varieties."

<sup>5</sup> Bags of 100 pounds.

<sup>6</sup> In addition to the 75,870 bags of seed of curly-top-resistant varieties, this figure includes 71,064 bags of seed, chiefly improved varieties arising from breeding work of beet-sugar companies; 32,639 bags of U. S. 200 × 215, a variety improved in leaf-spot resistance released by the Bureau of Plant Industry, and about 784 bags of stock seed of other improved varieties chiefly for use in future commercial seed production.

Bureau of Plant Industry. Compiled by Division of Sugar Plant Investigations from reports furnished by beet-sugar companies and their associations engaged in sugar-beet seed production.

<sup>1</sup> Includes Louisiana for all years, Florida from 1928 to 1941, and Texas from 1909 to 1923.<sup>2</sup> The growth of 9 months in Louisiana and 12 months in Florida. Sugar campaign, usually not ended before February in Louisiana and April in Florida, following season of growth of cane.<sup>3</sup> Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)<sup>4</sup> Calculated on the basis of 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.<sup>5</sup> Strip production not included. (See table 194.)<sup>6</sup> Preliminary. Actual production of cane sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining.

<sup>1</sup> Preliminary.

<sup>2</sup> The growth of 9 months in Louisiana; 12 months in Florida. Sugar campaign usually not ended before February in Louisiana and April in Florida, following season of growth of cane.

<sup>3</sup> Calculated by the Agricultural Adjustment Administration method. (S. R. Series 1, No. 1.)

<sup>4</sup> Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

<sup>5</sup> Florida production is entirely blackstrap.

<sup>6</sup> Includes 16,306,000 gallons blackstrap in 1940 and 20,895,000 gallons in 1941.

Agricultural Marketing Service.

<sup>1</sup> Crop year with beginning dates varying from September to the following June.<sup>2</sup> Figures for 1909-23 include Louisiana and Texas; 1924-27, Louisiana only; beginning 1928 Louisiana and Florida.<sup>3</sup> Normal grinding season begins October 1. In 1933 production was from grindings of October 1933 to December 31, 1934; for crop year 1934 and subsequent years production is from grindings of the next calendar year.<sup>4</sup> Includes the production of muscovado and panocha, a low grade of sugar mostly for domestic consumption.<sup>5</sup> Beet sugar (refined) reduced to raw basis by multiplying by 1.07.<sup>6</sup> Preliminary.

Bureau of Agricultural Economics.

<sup>1</sup> Figures are for the crop years 1909-10 to 1941-42 for the countries in which the sugar-production season begins in the fall months and is completed during the following calendar year, except in certain cane-sugar producing countries where the season begins in May or June and is completed in the same calendar year. Production in these countries is for the calendar years 1909-41.

<sup>2</sup> Production of cane and beet sugar in terms of raw for continental United States.

<sup>3</sup> The figures quoted for India are in terms of gur, a low-grade sugar polarizing between 50° and 60°. Practically the entire crop is consumed within the country.

<sup>4</sup> All grades of sugar reduced to terms of head sugar, a grade of sugar which contains at least 96.5 percent of sucrose. Figures for Java are for the calendar years 1909-41.

<sup>5</sup> Figures 1909-17 are for prewar boundaries.

<sup>6</sup> Figures are incomplete through 1920; 1914 includes Prussian Poland only; 1915-19 include Prussian Poland and Congress Poland; 1920 includes Prussian Poland, Congress Poland, and Galicia.

<sup>7</sup> Figures for 1909-18 refer to prewar boundaries; 1914-18 are exclusive of invaded territory.

<sup>8</sup> Includes the production of cane sugar in India. See note 3.

<sup>9</sup> Includes Austria and Sudetenland.

<sup>10</sup> Bohemia, Moravia, and Slovakia.

<sup>11</sup> Includes Austria, Sudetenland, Bohemia, Moravia, Slovakia, Eastern Provinces of Poland and General Government.

<sup>12</sup> Preliminary.

Bureau of Agricultural Economics.

TABLE 179.—*Sugar: Production in specified countries, averages 1925-29 and 1930-34, annual 1937-41*

## BEET SUGAR IN TERMS OF RAW SUGAR

| Estimated world total cane and beet sugar <sup>9</sup> ..... | 29,424     | 29,532     | 34,967     | 33,326     | 35,656     | 35,266     | 33,433              |

<sup>1</sup> Preliminary.<sup>2</sup> 4-year average.<sup>3</sup> Includes cane sugar.<sup>4</sup> Includes Austria and Sudetenland.<sup>5</sup> Includes Austria, Sudetenland, Bohemia, Moravia, Slovakia, Eastern Provinces of Poland, and General Government.<sup>6</sup> Bohemia, Moravia, and Slovakia.<sup>7</sup> Less than 500 tons.<sup>8</sup> Includes Turkey in Asia.<sup>9</sup> Excluding countries where production is very small and for which data are unobtainable.<sup>10</sup> The figures quoted for India are for the production of gur, a low-grade sugar, polarizing between 50° and 60°. Practically the entire crop is consumed within the country.<sup>11</sup> Figures are for the calendar years 1925-41.<sup>12</sup> The estimates are based upon information concerning the quantity of cane available. Actual production of sugar probably will be substantially smaller than that indicated.

Bureau of Agricultural Economics. Compiled from official sources, International Institute of Agriculture, sugar associations, and trade estimates. Figures are for the crop years 1925-26 to 1941-42 for the countries in which the sugar-harvesting season begins in the fall months and is completed during the following calendar year, except in certain cane-sugar producing countries in the Southern Hemisphere such as Argentina, Australia, Mauritius, Union of South Africa, etc., where the season begins in May or June and is completed in the same calendar year. Production in these countries is for the calendar years 1925-41.

<sup>1</sup> Harvesting usually begins in January and extends through June. The length of the growing season is normally 12 months.

<sup>2</sup> Includes all cane cut, left standing, and destroyed by fire.

<sup>3</sup> 1919-34 inclusive, sugarcane harvested for sugar; 1935 to date, sugarcane harvested for sugar and high-test molasses.

<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Prepared from data compiled by the Cuban Department of Agriculture and trade sources.

TABLE 181.—*Cane sugar: Production in Puerto Rico, 1919-42*

<sup>1</sup> Grinding begins in January. About  $\frac{1}{3}$  of the crop is of 18 months' growth and  $\frac{2}{3}$  is 12 months' growth.

<sup>2</sup> 1 ton of sugar as made is assumed to be equivalent to 0.9393 ton of refined for 1919-30 and 0.946 ton of refined beginning 1931, as recommended by the Joint Committee on Sugar Statistics of the Departments of Commerce and Agriculture.

<sup>3</sup> Actual quantity of sugarcane harvested, including 6,392,547 tons of sugarcane cut for the production of sugar and 1,125,914 for the production of high-grade molasses. It is estimated that about 1,935,542 tons of sugarcane were left standing and harvested the following year.

<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from annual reports of the Governor of Puerto Rico.

TABLE 182.—*Cane sugar: Production in Hawaii, 1919-41*

| Year                    | Total acreage in cane | Cane used for sugar |                             |                   | Sugar produced                          |                                 | Raw sugar 96° made per short ton of cane | Recovery of equivalent refined sugar from cane ground <sup>4</sup> |

<sup>1</sup> The growth of 18 to 24 months. Only a portion of the total acreage in cane is harvested each year.

<sup>2</sup> Converted in accordance with Sugar Regulations, Series 1, No. 1, U. S. Department of Agriculture, Agricultural Adjustment Administration, issued Feb. 18, 1935.

<sup>3</sup> 1 ton of raw sugar, 96° test, is assumed to be equivalent to 0.9346 ton of refined.

<sup>4</sup> Based on tonnage of cane used.

Agricultural Marketing Service. Collected through the Hawaiian Sugar Planters' Association. For earlier years, see Agricultural Statistics, 1941, table 202.

<sup>1</sup> Harvesting begins about Nov. 1, the length of the growing season being about 11 months.

<sup>2</sup> Calculated cane production divided by acreage.

<sup>3</sup> Calculated cane production is the sum of the estimated quantities of cane used for the production of the various kinds of sugar and basi. The quantity of cane ground for the production of centrifugal sugar is estimated on the basis of the reported yield of sugar per ton of cane. The quantity of cane ground for the production of muscovado, panocha, and basi is estimated on the basis of assumed ratios of juice extraction between the small mills and centrals.

<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from reports of Philippine Department of Agriculture and Commerce.

<sup>1</sup> Harvesting begins about Nov. 1, the length of the growing season being about 11 months.<sup>2</sup> Compiled from variety census, Philippine Sugar Association. Data not available for 1921-28 and 1934 and 1935.<sup>3</sup> Calculated cane production divided by acreage.<sup>4</sup> Quantity of cane ground for the production of centrifugal sugar is estimated on the basis of the reported yield of sugar per ton of cane.<sup>5</sup> 1 ton of sugar as made is assumed to be equal to 0.95 ton of refined for 1921-30, and 0.946 ton of refined beginning 1931, as recommended by the Joint Committee on Sugar Statistics of the Departments of Commerce and Agriculture.<sup>6</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from reports of Philippine Department of Agriculture and Commerce.

TABLE 185.—*Sugar: Stocks, production, trade, and supply available for consumption in continental United States, in terms of raw sugar, 1909-41*

| Year beginning July    | Stocks as of July 1 <sup>1</sup> | Production <sup>2</sup> | Brought in from insular possessions <sup>3</sup> | Imports as sugar <sup>4</sup> | Domestic exports as sugar <sup>5</sup> | Domestic exports in other forms <sup>6</sup> | Available for consumption |            |                      |

<sup>1</sup> Beginning 1909, stocks on hand are taken into account. Figures for 1909-21 are for cane sugar only; stocks on hand July 1, 1922, comparable with July 1, 1921, amounted to 295,492 tons; 1922-34 includes stocks of raw cane sugar in all ports and beet sugar held by factories, according to trade sources. Beginning 1935, includes stocks of raw and refined sugar held by refiners, by importers and distributors of direct consumption sugar, and by beet-sugar factories, as reported by the Sugar Division, U. S. Department of Agriculture. Stocks on July 1, 1935, comparable with July 1, 1934, totaled 1,051,296 tons, raw value.

<sup>2</sup> Beet and cane sugar only. Beet converted to raw at the rate of 1.075 until 1921.

<sup>3</sup> Duty free, from Hawaii, Puerto Rico, and the Philippine Islands (Virgin Islands included 1917 and subsequently).

<sup>4</sup> No account taken of sugar imported in other forms. Imports from the Philippine Islands excluded 1909 to date and Virgin Islands 1917 to date, reexports deducted through 1932; imports for consumption beginning 1933.

<sup>5</sup> Shipments to Hawaii and Puerto Rico included, also to Alaska beginning 1933, and to Virgin Islands beginning January 1935. Direct exports, to foreign countries, through customs districts of noncontiguous territories excluded.

<sup>6</sup> Sugar used in the manufacture of other commodities for export, on which drawback was paid, taken into account beginning 1909.

<sup>7</sup> Raw sugar converted to refined by multiplying raw by the factor 0.9369 for the years 1909-21; for factors used in subsequent years see table 181, Agricultural Statistics, 1939.

<sup>8</sup> Preliminary.

<sup>9</sup> Partly estimated.

Bureau of Agricultural Economics. Trade figures from the Bureau of Foreign and Domestic Commerce. Data for 1866-1908 in Agricultural Statistics, 1941, table 206.

<sup>1</sup> Raw sugar imported for direct consumption has been converted to refined basis. Stocks include sugar in bond and in customs' custody and control.

<sup>2</sup> Sugar for direct consumption only. All sugars converted to refined basis.

<sup>3</sup> Preliminary.

<sup>4</sup> Includes sales for export. The Department of Commerce reported exports of refined sugar amounting to 136,481 tons in 1934; 113,957 tons in 1935; 61,716 tons in 1936; 70,191 tons in 1937; 61,826 tons in 1938; 124,554 tons in 1939; 167,923 tons in 1940; and 44,647 tons during the first 9 months of 1941, balance of year not available.

<sup>5</sup> Larger than actual deliveries by a small amount representing losses in reprocessing, etc.

<sup>6</sup> Does not include raw sugar delivered by refineries for direct consumption as follows: 1934, 17,153 tons; 1935, 10,183 tons; 1936, 11,032 tons; 1937, 13,946 tons; 1938, 10,480 tons; 1939, 6,176 tons; 1940, 7,779 tons; and 1941, 8,573 tons.

Sugar Agency, Agricultural Conservation and Adjustment Administration. Compiled in the administration of the Jones-Costigan Act, Public Res. No. 109, and the Sugar Act of 1937 from reports by cane-sugar refineries, beet-sugar factories, importers of direct-consumption sugar, and continental cane-sugar mills.

<sup>1</sup> Preliminary.

<sup>2</sup> Java and Madura only.

<sup>3</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudestenland for the period October-December 1938.

<sup>4</sup> International Yearbook of Agricultural Statistics.

<sup>5</sup> January-June, last published data.

<sup>6</sup> Includes imports from Virgin Islands of United States through 1935; Philippine Islands all years, but does not include shipments from Hawaii and Puerto Rico.

<sup>7</sup> Beginning April 1937, foreign trade of Burma not included.

<sup>8</sup> January only, last published data.

<sup>9</sup> Prior to April 1937, foreign trade included with British India.

<sup>10</sup> Not shown prior to 1932; included with data for China.

<sup>11</sup> 3-year average.

<sup>12</sup> January-April, last published data.

<sup>13</sup> January-March, last published data.

<sup>14</sup> Year beginning Mar. 21, 1925-1930; year beginning June 22, 1931-38; year beginning Mar. 21, 1939, to date.

<sup>15</sup> June 22, 1938-Mar. 21, 1939; full year not available.

<sup>16</sup> January-July, last published data.

<sup>17</sup> Year beginning April.

<sup>18</sup> January-February, last published data.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. The following kinds and grades have been included under the head of sugar: Brown, white, candied, caramel, chancana (Peru), crystal cube, maple, muscovado, panola. The following have been excluded: "Candy" (meaning confectionery), confectionery, glucose, grape sugar, jaeger, molasses, and sirups.

TABLE 192.—*Sugar, refined: Average wholesale price per pound, New York, average 1930-39, annual 1932-42*<sup>1</sup>

<sup>1</sup> Production, exports, and imports are not comparable; i. e., production figures are on a farm-sales-weight basis, whereas exports and imports are on a declared-weight basis.

<sup>2</sup> Prior to 1919 prices are as of Dec. 1.

<sup>3</sup> Compiled from Commerce and Navigation of the United States, 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June issues, 1927-40; and official records of the Bureau of Foreign and Domestic Commerce.

<sup>4</sup> Total exports (domestic plus foreign) minus imports. Beginning 1933 domestic exports minus imports for consumption.

<sup>5</sup> Beginning 1933, imports for consumption.

<sup>6</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 223.

<sup>9</sup> 14 provinces only.

<sup>10</sup> British India and reporting native States; Burma not included.

<sup>11</sup> Burma became independent from British India in April 1937.

<sup>12</sup> Native production of Blad tabak (high-grade leaf) bought up by European estates from natives, plus official estimate of exports of native-grown Krossok (low-grade leaf) produced off estates.

<sup>13</sup> Estate production by Europeans. Production by natives on locations and reserves is estimated at about 1,000,000 pounds annually.

<sup>14</sup> Exclusive of China.

Bureau of Agricultural Economics. Compiled from official sources, International Institute of Agriculture, and reports of United States consuls, commercial attachés, agricultural attachés, and commodity specialists in foreign countries.

<sup>1</sup> The year beginning July, which corresponds most nearly to the harvesting year. For example, in the Northern Hemisphere, data for 1938 are for crops harvested in the summer and fall of 1938; in the Southern Hemisphere, they are for crops harvested in the spring of 1939. For many countries bordering on the equator, data are for the harvest which started late in 1938 and continued into the early months of 1939.

<sup>2</sup> Preliminary. Figures for earlier years may be revised on the basis of later information.

<sup>3</sup> Calculated from actual acreage and production, except in instances where rounded figures only were available.

<sup>4</sup> 1 year only.

<sup>5</sup> 4-year average.

<sup>6</sup> 500 acres or less.

<sup>7</sup> 3-year average.

<sup>8</sup> 2-year average.

<sup>1</sup> Stocks as of July 1 and disappearance beginning July 1.<sup>2</sup> Stocks shown represent those held by dealers and manufacturers who are required by law to file quarterly reports. Farm-sales weight is calculated by converting stemmed to unstemmed and storage weight to farm-sales weight, by allowing for normal losses of dirt, sand, moisture, and stem in handling and preparing tobacco.<sup>3</sup> Preliminary.<sup>4</sup> Stocks as of Jan. 1 of year following production, and disappearance beginning Jan. 1 of year following production.<sup>5</sup> Production data are for the harvesting year beginning July, and stocks are as of Jan. 1 in the harvesting year. Stocks include those held by dealers and manufacturers in the United States and on the island of Puerto Rico. Stocks on the island were not reported prior to Jan. 1, 1936.<sup>6</sup> Including loss after harvest as a result of hurricane and flood estimated as follows: Broadleaf (type 51) 3,820,000 pounds; Havana Seed (type 52) 1,547,000 pounds; and Shade (type 61) 588,000 pounds.

Bureau of Agricultural Economics. Production, stocks, and price compiled from reports of the Agricultural Marketing Service, except production and price of Puerto Rican tobacco, which were compiled respectively from annual reports of the Governor of Puerto Rico and from Bulletin 60 of the Puerto Rican Agricultural Experiment Station, June 1941.

<sup>1</sup> The quantities given are unstemmed equivalent of all kinds of tobacco used. Stemmed leaf and scrap, etc., used in manufacturing have been converted to unstemmed equivalent at the ratio of 3 pounds stemmed to 4 pounds unstemmed; in respect to leaf used in the manufacture of tobacco and snuff prior to 1928 no conversion factor was used, but in this table all figures are compiled on the conversion basis named.

Agricultural Marketing Service. Compiled from annual reports of the Commissioner of Internal Revenue, Treasury Department.

<sup>1</sup> Simple average of weekly prices; usually the Tuesday quotation. All prices include the internal-revenue tax.

<sup>2</sup> Composite price of 3 price series, per 1,000 f. o. b. destination.

<sup>3</sup> Composite price of 12 price series, per 1,000, f. o. b. destination, representing an average of cigars selling for 10 cents or less.

<sup>4</sup> Per pound, New York.

<sup>5</sup> 1-ounce bags, per gross, New York. Granulated.

<sup>6</sup> Dry, sweet, per ½ gross of 1½-ounce average containers, list price, destination.

Bureau of Agricultural Economics. Compiled from official records of the Bureau of Labor Statistics, Department of Labor.

TABLE 211.—*Tobacco products: Cigars, cigarettes, chewing, smoking, and snuff, manufactured in the United States, 1919-40*

<sup>1</sup> Crushings and products are not limited to the crop specified.<sup>2</sup> Estimated from the production of lint cotton, assuming 65 pounds of seed for each 35 pounds of lint.<sup>3</sup> The reported production of meal for years beginning August 1932 has averaged about 45 percent of the weight of seed crushed.<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Production less quantity used for seed compiled from records of Agricultural Marketing Service; quantity crushed and products from annual reports of Bureau of Census.

<sup>1</sup> Average is for months shown.<sup>2</sup> Less than 10 quotations during the month. Other quotations were bids.

Bureau of Agricultural Economics. Compiled from the Oil, Paint, and Drug Reporter except October 1932-June 1933, from the New York Journal of Commerce, when prices were not quoted in the usual source. Prices are average of quotations for Fridays during the month, except August 1930-July 1934, which are averages of daily quotations.

Data for earlier years are available in the 1930 Yearbook, table 149, and 1940 Agricultural Statistics, table 177.

<sup>1</sup> Prior to 1908 prices are as of Dec. 1.<sup>2</sup> August 1900-December 1920, averages of daily closing prices compiled from annual reports of the Minneapolis Chamber of Commerce; beginning January 1921, averages of daily prices weighted by carlot sales, compiled from Minneapolis Daily Market Record.<sup>3</sup> Compiled from Commerce and Navigation of the United States 1899-1917; Foreign Commerce and Navigation of the United States, 1918; Monthly Summary of Foreign Commerce of the United States, June issues, 1919-26; January and June, 1927 to date, and official records of the Bureau of Foreign and Domestic Commerce. Flaxseed, general imports 1899-1932; imports for consumption beginning 1933. Linseed oil, imports for consumption 1899-1912, and beginning 1933; general imports 1912-32. No reexports of oil reported prior to July 1, 1911; no reexports of seed or oil reported since December 1922. 1 bushel of flaxseed weighs 56 pounds; 1 bushel of seed yields approximately 2½ gallons of oil, and 1 gallon of oil weighs 7½ pounds.<sup>4</sup> Total imports minus total exports (domestic plus foreign). Beginning 1933 imports for consumption minus domestic exports.<sup>5</sup> Net exports.<sup>6</sup> Beginning 1933 figures are imports for consumption.<sup>7</sup> Preliminary.<sup>8</sup> Includes an allowance for unredeemed loans at average loan value.

Agricultural Marketing Service and Bureau of Agricultural Economics. Italic figures are census returns. For earlier years, see Agricultural Statistics, 1941, table 109.

TABLE 221.—Flax: Acreage and production in specified countries, year of harvest, averages 1925-29 and 1930-34, annual 1939-41<sup>1</sup>

| Country                       | Acreage            |                    |                  |                  | Seed production   |                    |                    |                  | Fiber production |                   |                    |                    |                  |                  |                   |

South America:<sup>1</sup>

Argentina.....

Uruguay.....

Estimated world total excluding China <sup>10</sup>.....

<sup>1</sup> Figures refer to year of harvest. Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere, which immediately follow; thus, the crop harvested in the Northern Hemisphere countries in 1940 is combined with the Southern Hemisphere harvest, which began late in 1940 and ended early in 1941.

<sup>2</sup> Preliminary.<sup>3</sup> No official information available.<sup>4</sup> Flax and hemp.<sup>5</sup> Actual territory.<sup>6</sup> 4-year average.<sup>7</sup> Estimate.<sup>8</sup> 2-year average.<sup>9</sup> Excludes Bessarabia and Northern Bukovina.<sup>10</sup> Slovakia only.<sup>11</sup> Including the re-annexed north zone but excluding Sub-Carpathia.<sup>12</sup> Including the re-annexed north zone and Sub-Carpathia.<sup>14</sup> Officially reported production plus Indian official estimates for unreported tracts except in 1940 and 1941, when no estimates for unreported tracts were available.<sup>15</sup> Unofficial.<sup>16</sup> The estimated world totals exclude China but include arbitrary estimates for a few minor producing countries and for some years for which data are unavailable.

<sup>1</sup> Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere, which immediately follow; thus, the crop harvested in the Northern Hemisphere countries in 1940 is combined with the Southern Hemisphere harvest which began late in 1940 and ended early in 1941.<sup>2</sup> Officially reported production plus Indian official estimates for unreported tracts except in 1940 and 1941, when estimates for unreported tracts were not available.<sup>3</sup> Flax and hemp.<sup>4</sup> Exports. Manchuria not included after June 1932.<sup>5</sup> Estimate of the Bureau of Agricultural Economics.<sup>6</sup> Total for countries shown.<sup>7</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from official sources and the International Institute of Agriculture.

<sup>1</sup> Does not include flaxseed used for seed in States for which production estimates are not made.<sup>2</sup> Relates to quantities used by producers on their own farms. Additional quantities of purchased flaxseed are so utilized.<sup>3</sup> Computed from figures on production, trade, and stocks. The sum of seed requirements and crushings differs somewhat from this total.<sup>4</sup> Preliminary.

Bureau of Agricultural Economics. Compiled from reports of the Agricultural Marketing Service and Bureau of the Census. Farm disposition relates to the crop specified and not to disposition within the marketing year.

<sup>1</sup> Domestic flaxseed in store in public and private elevators at terminal markets and flaxseed afloat in vessels or barges in harbors of lake and seaboard ports, Saturday nearest the 1st of the month. Data not entirely comparable from year to year because of addition of new markets and dropping of markets at which commercial storage of grain was discontinued.

<sup>2</sup> Canadian flaxseed in Canada exclusive of farm stocks, Friday nearest the 1st of the month.

Agricultural Marketing Service. Canadian flaxseed in Canada from Canadian Bureau of Statistics.

<sup>1</sup> Farmers signing acreage-restriction contracts, as most commercial producers did, were eligible to receive in addition, from the Department of Agriculture, 0.4 cent per pound for the quantity of peanuts harvested in 1934, or not less than \$2 per acre of the allotted peanut acreage on a farm covered by an A. A. A. contract.

## Agricultural Marketing Service.

Prices, compiled from weekly market news reports on peanuts issued by the Service, are based on sales to large millers. In the Virginia-North Carolina section peanut growers usually sell by eighth fractions of a cent per pound; in the Southeastern section sales are on a per-ton basis, and in the Southwestern States sales are on a 30-pound bushel basis. For the 2 latter areas, conversions have been made to a per-pound basis.

TABLE 241.—*Peanuts: Yearly average price per pound of cleaned and shelled peanuts for prompt shipment, f. o. b. important shipping points, 1929-30 to 1940-41, by approximate crop years*<sup>1</sup>VIRGINIA-NORTH CAROLINA SECTION: VIRGINIA, NORTH CAROLINA, AND TENNESSEE<sup>2</sup>

<sup>1</sup> Crop year begins about Nov. 1 in the Virginia-North Carolina section; in early September in the Southeastern States, and at present in early August in the Southwestern States. Before planting became important in south Texas, about 1928, new-crop peanuts were not usually available from the Southwest before the middle of September, and at times not until October.

<sup>2</sup> Shipping points, season beginning Nov. 2, 1940: *Virginia*: Boykins, Courtland, Franklin, Petersburg, Stony Creek, Suffolk, Zuni. *North Carolina*: Ahsokie, Edenton, Elizabethtown, Enfield, Hampstead, Lewiston, Scotland Neck, Tarboro, Williamston. *Tennessee*: Nashville, Memphis.

<sup>3</sup> Prices from Oct. 1, 1934, to Jan. 6, 1936, include processing tax of 1.05 cents per pound on cleaned peanuts, and 1.5 cents per pound on shelled peanuts.

<sup>4</sup> Shipping points, season beginning August 31, 1940: *Georgia*: Albany, Americus, Arlington, Ashburn, Bainbridge, Blakely, Cairo, Camilla, Colquitt, Cordele, Dawson, Donaldsonville, Fitzgerald, Fort Gaines, Hawkinsville, Leary, Leesburg, Macon, Moultrie, Ocilla, Oglethorpe, Pelham, Savannah, Shellman, Sycamore, Thomasville, Tifton, Valdosta. *Alabama*: Andalusia, Brundidge, Dothan, Enterprise, Eufaula, Florida, Hartford, Headland, Peterman, Samson, Troy. *Florida*: Greenwood, High Springs, Malone, Marianna. *Mississippi*: Jackson.

<sup>5</sup> Shipping points, season beginning July 27, 1940: *Texas*: Abilene, Carbon, Comanche, DeLeon, Denison, Dublin, Fort Worth, Houston, Nixon, San Antonio, Stephenville, Stockdale, Waco. *Oklahoma*: Bristow, Durant, Hugo. *Arkansas*: Fort Smith. *California*: Turlock. *New Mexico*: Portales.

Agricultural Marketing Service. Compiled from weekly market news reports issued by the Service. Shellers and cleaners usually sell peanuts in eighth fractions of a cent per pound or in decimal fractions. Prices in this table are based on returns from cleaners, shellers, and brokers. They are straight averages.

<sup>1</sup> Preliminary.

Agricultural Marketing Service; based on returns from special price reporters. Monthly prices, by States, weighted by production to obtain monthly prices for the United States. Season average prices for each State based on monthly prices weighted by estimates of monthly sales during the crop marketing season. Season average prices, by States, weighted by production to obtain United States season average.

<sup>1</sup> Preliminary.

<sup>2</sup> January only, last published data.

<sup>3</sup> International Yearbook of Agricultural Statistics.

<sup>4</sup> Not shown prior to 1932; included in data for China.

<sup>5</sup> 3-year average.

<sup>6</sup> Includes British Cameroons.

<sup>7</sup> Java and Madura only.

<sup>8</sup> Beginning April 1938, trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.

<sup>9</sup> January-April, last published data.

<sup>10</sup> January-March, last published data.

<sup>11</sup> January-June, last published data.

<sup>12</sup> January-July, last published data.

<sup>13</sup> 4-year average.

Bureau of Agricultural Economics. Compiled from official sources except as otherwise stated. Includes shelled and unshelled peanuts, assuming the peanuts to be unshelled unless otherwise stated. When shelled nuts were reported, they were reduced to terms of unshelled at the ratio of 3 pounds unshelled to 2 pounds shelled.

TABLE 244.—*Peanuts: Quantity of farmers' stock milled; production of cleaned peanuts (in the shell), shelled peanuts, crude oil, and meal, and foreign trade in oil and meal, 1934-35 to 1940-41*

<sup>1</sup> Beginning Aug. 1 in the Southwest area, Sept. 1 in the Southeast area, and Nov. 1 in the Virginia-Carolina area.

<sup>2</sup> Byproduct in the production of edible-grade shelled peanuts and is used mostly in the production of crude peanut oil and meal.

<sup>3</sup> Excludes free for export.

<sup>4</sup> Preliminary.

Agricultural Marketing Service and Bureau of Agricultural Economics. Foreign trade figures from Monthly Summary of Foreign Commerce of the United States. Exports of peanut cake and meal, if any, are not separately reported.

<sup>1</sup> Preliminary.<sup>2</sup> These figures are for yellow soybeans, which variety constitutes fully 98 percent of the soybean exports.<sup>3</sup> Included with China.<sup>4</sup> 3-year average.<sup>5</sup> Imports for consumption.<sup>6</sup> Domestic exports of soybeans are not separately reported in Foreign Commerce and Navigation of the United States prior to 1937.<sup>7</sup> Beginning April 1938 trade between Germany and Austria no longer reported as foreign trade in the German statistics. The same applies to trade between Germany and Sudetenland for the period October-December 1938.<sup>8</sup> January-March, last published data.
